Battery Disposal

The device is supported by a battery. In order to protect the environment, please read the following points concerning battery disposal:

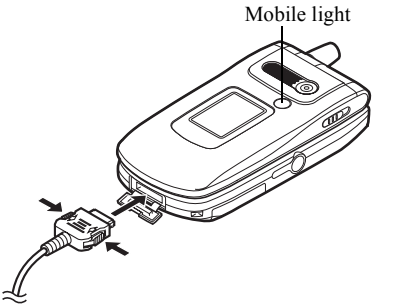
- Take the used battery to your local waste depot, dealer or customer service centre for recycling.
- Do not expose the used battery to an open flame, into water or dispose with the household waste.

Charging the Battery

You must charge the battery for at least 2 hours before using your phone for the first time.

Using the Charger

1. Connect the charger to the external socket located at the bottom of the phone by pressing both sides indicated with arrows, and connect to an AC outlet.



The mobile light lights red.
Standard charging time: Approx. 2 hours.

Note

- *Charging time may vary depending on the state of the battery and other conditions. (See "Battery" on page 198.)*

To Disconnect the Charger

Push and hold the side buttons of the charger, then disconnect the charger from the external socket of the phone.

2. When charging is complete, the mobile light turns off. Unplug the charger from the AC outlet, then unplug the charger connector from the phone.

Note

- *Do not use any non approved charger, this may damage your phone and invalidate any warranty, please see "Battery" on page 198 for details.*
- *When the phone is charging, the animated battery status icon ( ) in the upper right of the screen displays the current status.*

To Charge Using the Cigarette Lighter Charger

2. Press to dial.

Emergency Calls

1. Enter 112 (international emergency number) using the keypad.
2. Press to dial.

Note

- *Emergency calls may not be available on all mobile phone networks when certain network services and/ or phone features are in use. Contact your network operator for more information.*
- *This Emergency number can normally be used to make an emergency call in any country, with or without a SIM card inserted, if a GSM network is within range.*

International Calls

1. Press and hold until a "+" (international dialling prefix) sign is displayed.
2. Enter the country code, followed by the area code and the number.
3. Press to dial.

Note

- *Enter the area code omitting the first 0 when making international calls, in most cases. (It differs for some countries.)*

Speed Dialling

Up to 9 phone numbers from the Phonebook memory (Handset and SIM) can be assigned to speed dials. You can call the numbers using the digit keys (to and).

For details on setting the Speed Dial List, see "Speed Dial List" on page 53.

1. To dial a number using the speed dial, press and hold any of the digit keys (to and).
   The phone number stored in the Speed Dial List is dialled.

Redialling

You can redial the numbers in the call log list that you may have missed, received or dialled. Each list can contain up to 10 numbers.

1. Press during stand-by.
2. Press or to highlight a category between "Dialled Numbers", "Missed Calls" and "Received Calls".
3. Press or to highlight the number you wish to call.
4. Press to redial the call.

Automatic Redialling

This setting allows you to automatically redial the number if the first attempt was unsuccessful.

If you wish to stop redialling, press or [End].

When you press [Options] and select "Play before Cursor" whilst entering notes, the melody, that is displayed on the screen, is played back up to the cursor position.

When you press [Options] and select "Select Chord", you can select another chord. Repeat steps 9 to 11 to input notes for the new chord.

13. When you finish inputting, press [Options] to display the Options menu.

14. Press ▲ or ▼ to highlight "Save", then press ● or [Select] to select.

15. Press ▲ or ▼ to highlight "Save to Gallery", then press ● to select.

Your original ringtone is registered in Sound Gallery.

Note

- *If the capacity or memory in the handset memory becomes insufficient, the message, "Maximum capacity : 1000 Not registered." or "Not registered. Memory full." is displayed. The display returns to the screen of step 15. Try again after deleting unnecessary data (p. 107).*
- *Melodies consisting of too many short notes (semiquavers and triplets) cannot be played back in step 12 and the following message is displayed: "Can not play due to too many notes per sec." The screen returns to step 9.*
  The message "Can not save due to too many notes per sec." may also be displayed, and the screen returns to step 9.
  Reduce the number of melodies, replace short notes, cancel triplets, etc. to remedy.

To Specify the Musical Scale and Rest

Using the keys shown below, specify the musical scale and rest.

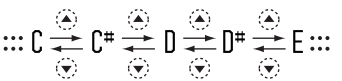
Do	Re	Mi	Fa	Sol	La	Ti	Rest
1	2	3	4	5	6	7	0

When you press the key shown above once, a crotchet is specified in the middle scale (no mark).

When you press the same key repeatedly, the note will shift cycle through the available octave ranges.

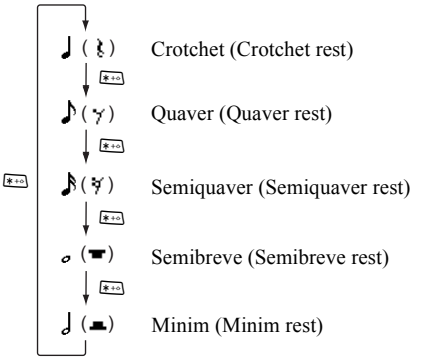
When you press ▲ or ▼ whilst a note is selected, the note will move one semitone higher or lower.

When entering rest: Crotchet rest is entered.



To Specify the Types of Notes and Rests

Specify notes and rests by pressing * or # repeatedly.



When you make a dotted note or a triplet, press 9 after selecting the target note.

Note

- *You cannot make a dotted semiquaver (semiquaver rest) or a dotted semibreve (semibreve rest).*
- *Three continuous notes are required for a triplet.*

To specify a tie, press 8 after selecting the target notes.

An underscore (_) is displayed next to the note, and the note is tied with the next one.

To enter the next note, press ▶ and move the cursor to the right. Then, repeat the operation on the previous page.

If the cursor is positioned next to a note, you can repeat the note immediately left of the cursor when ▲ or ▼ is pressed.

To Set the Tone

This allows you to change the PIN code stored on the SIM card. Before you change the PIN code, select “On” in step 5 in “Enabling/Disabling the PIN Code” on page 184.

1. Perform steps 1 to 3 in “Opening the Security Screen” on page 184.
2. Press ▲ or ▼ to highlight “PIN Entry”, then press ● to select.
3. Press ▲ or ▼ to highlight “Change PIN”, then press ● to select.
4. Enter the existing PIN code, then press ●.
5. Enter a new PIN code, then press ●.
6. Enter a new PIN code again, then press ●.
   If you enter a code different from the code which you entered in step 6, the screen returns to step 5. Enter the correct code again.
7. Press ●.

Handset Lock (M 9-8-2)

The Handset Lock is an additional security feature which prevents unauthorised use of the phone or certain features. The default handset lock code is “0000”.

1. Perform steps 1 to 3 in “Opening the Security Screen” on page 184.
2. Press ▲ or ▼ to highlight “Handset Lock”, then press ● to select.
3. Press ▲ or ▼ to highlight “On” or “Off”, then press ● to select.
4. Enter your handset code, then press ●.
   If you enter an incorrect handset code, the screen will clear and you are prompted to enter the code again.

To Change Handset Code

Before you change the handset code, select “ON” in step 3 in “Handset Lock” on page 185. The default handset code is “0000”.

1. Perform steps 1 to 2 in “Opening the Security Screen” on page 184.
2. Press ▲ or ▼ to highlight “Handset Lock”, then press ● to select.
3. Press ▲ or ▼ to highlight “Change Code”, then press ● to select.
4. Enter the old handset code, then press ●.
5. Enter a new handset code, then press ●.
6. Enter the new handset code again, then press ●.
   If you enter a code different from the code which you entered in step 5, the screen returns to step 4. Enter the correct code again.

Changing PIN2 Code (M 9-8-3)

PIN2 code is used to protect certain functions in the phone such as Fixed Dialling No. and call cost limits. The following shows you how to change PIN2 code.

1. Perform steps 1 to 3 in “Opening the Security Screen” on page 184.
2. Press ▲ or ▼ to highlight “Change PIN2”, then press ● to select.
3. Enter the existing PIN2 code, then press ●.
4. Enter a new PIN2 code, then press ●.
5. Enter the new PIN2 code again, then press ●.
   If you enter a code different from the code which you entered in step 5, the screen returns to step 4. Enter the correct code.
6. Press ●.

Call Barring (M 9-8-4)

This function lets you place restrictions on incoming and outgoing calls. To activate Call Barring you will need the call barring password, which is available from your service provider.

1. Perform steps 1 to 3 in "Opening the Security Screen" on page 184.
2. Press ▲ or ▼ to highlight "Call Barring", then press ● to select.
3. Press ▲ or ▼ to highlight call barring option, then press ● to select.

The call barring functions available are:

- "Bar Foreign Calls": Restricts all outgoing international calls.
- "Only Local & Home": Restricts all outgoing international calls except to your home country.
- "Bar Incoming Calls": Restricts all incoming calls.
- "Bar Inc if Abroad": Restricts all incoming calls when you are outside of the coverage from your registered network operator.
- "Bar Outgoing Calls": Restricts all outgoing calls except emergency calls.

4. Press ▲ or ▼ to highlight one of the call barring options, then press ● to select.

The call barring options available are:

- "All services": Restricts all services.
- "Voice Calls": Restricts all voice calls.
- "Data": Restricts all data calls.
- "Fax": Restricts all fax calls.
- "Messages": Restricts all messages.
- "All except msgs": Restricts all services except messages.

5. Press ▲ or ▼ to highlight "On", then press ● to select.

   If you select "Off", the selected call barring setting is cancelled.

6. Enter the network password, then press ●.

   To change the network password, see "Changing the Network Password" on page 183.
   The selected call barring function is activated.
   If you enter a wrong network password, the entered password is cleared. Enter the correct password.

To Cancel All Call Barring Settings

1. Perform steps 1 to 3 in “Opening the Security Screen” on page 184.
2. Press ▲ or ▼ to highlight “Call Barring”, then press ● to select.
3. Press ▲ or ▼ to highlight “Cancel All”, then press ● to select.
4. Enter the network password, then press ●.
   All call barring settings are cancelled.

To Cancel the Call Barring Setting Individually

1. Perform steps 1 to 3 in “Opening the Security Screen” on page 184.
2. Press ▲ or ▼ to highlight “Call Barring”, then press ● to select.
3. Press ▲ or ▼ to highlight the call barring option, then press ● to select.
4. Press ▲ or ▼ to highlight the call barring option you wish to cancel, then press ● to select.
5. Press ▲ or ▼ to highlight “Off”, then press ● to select.
6. Enter the network password, then press ●.
   The selected call barring setting is cancelled.

Fixed Dialling No. (M 9-8-5)

When the Fixed Dialling No. is enabled, you can only call predefined numbers.

To Enable Fixed Dialling No.

1. Perform steps 1 to 3 in “Opening the Security Screen” on page 184.
2. Press ▲ or ▼ to highlight “Fixed Dialling No.”, then press ● to select.
3. Enter a PIN2 code, then press ●.
4. Press ▲ or ▼ to highlight “Settings”, then press ● to select.
5. Press ▲ or ▼ to highlight “On”, then press ● to select.
   If you select “Off”, Fixed Dialling No. is disabled.

To Add a New Name

1. Perform steps 1 to 3 in “Opening the Security Screen” on page 184.
2. Press ▲ or ▼ to highlight “Fixed Dialling No.”, then press ● to select.
3. Enter a PIN2 code, then press ●.
4. Press ▲ or ▼ to highlight “Edit Dial List”, then press ● to select.
5. Press [Options] to display the Options menu.
6. Press ▲ or ▼ to highlight “Add new”, then press ● or [Select] to select.
7. Add a name and a phone number.

   For details on adding a name and a phone number, see “Add New” on page 43.
8. Press [Save] to save.

To Search a Registered Name

1. Perform steps 1 to 3 in “Opening the Security Screen” on page 184.
2. Press ▲ or ▼ to highlight “Fixed Dialling No.”, then press ● to select.
3. Enter a PIN2 code, then press ●.
4. Press ▲ or ▼ to highlight “Edit Dial List”, then press ● to select.
5. Press [Options] to display the Options menu.
6. Press ▲ or ▼ to highlight “Search”, then press ● or [Select] to select.
7. Search for the desired name.

   For details on searching a name, see “Finding a Name and Number” on page 47.

To Edit a Registered Name

1. Perform steps 1 and 3 in “Opening the Security Screen” on page 184.
2. Press ▲ or ▼ to highlight “Fixed Dialling No.”, then press ● to select.
3. Enter a PIN2 code, then press ●.
4. Press ▲ or ▼ to highlight “Edit Dial List”, then press ● to select.
5. Press ▲ or ▼ to highlight a name you wish to edit, then press ⌐ [Options] to display the Options menu.
6. Press ▲ or ▼ to highlight “Edit”, then press ● or ⌐ [Select] to select.
7. Edit the selected name.
   For details on editing a name, see “Editing Phonebook Entries” on page 48.

To Delete a Registered Name

1. Perform steps 1 to 3 in “Opening the Security Screen” on page 184.
2. Press ▲ or ▼ to highlight “Fixed Dialling No.”, then press ● to select.
3. Enter a PIN2 code, then press ●.
4. Press ▲ or ▼ to highlight “Edit Dial List”, then press ● to select.
5. Press ▲ or ▼ to highlight a name you wish to delete, then press ⌐ [Options] to display the Options menu.
6. Press ▲ or ▼ to highlight “Delete”, then press ● or ⌐ [Select] to select.
7. Press ⌐ [Yes].
   The selected name is deleted.
   To cancel deletion, press ⌐ [No] in step 4.

Master Reset (M 9-9)

All settings can be reset to their default settings.

1. Press ● to display the Main menu.
2. Press ▲, ▼, ◀ or ▶ to highlight “Settings”, then press ● to select.
3. Press ▲ or ▼ to highlight “Master Reset”, then press ● to select.
4. Enter your handset code, then press ●.
5. Press [Yes].

   To cancel resetting, press [No] in step 5.

   All settings are reset.

Note

- *If you enter a wrong handset code in step 4, the operation is cancelled.*

Connecting GX32 to Your PC

You can use the following functions by connecting the GX32 to your PC using an infrared port or USB port*:

- GSM/GPRS modem
- Handset Manager for GX32

* Requires an optional USB data cable XN-1DC30 for USB port connection.

System Requirements

Operating System: Windows® 98*, Windows® Me, Windows® 2000**, Windows® XP***

* Windows® 98 Second Edition, Windows® 98 Service Pack 1
** Service Pack 4
***Service Pack 1a

Interface: Infrared port or USB port

CD-ROM drive

GSM/GPRS Modem

You can use GX32 as a GSM/GPRS modem to access the Internet from your PC. Connect your phone to your PC via the Infrared connection or a USB cable and install the necessary software. For details, see "Software Installation" on page 193.

Modem via the Infrared Connection

To use the modem function via the Infrared connection, see "Using the Infrared Function (For Modem)" on page 175 and turn the modem function on.

Modem via the USB Cable

To use the modem function using a USB cable, use the cable mentioned above and see the instructions accompanying the cable.

For details on software support, refer to the following site:

http://www.sharp-mobile.com

Note

Modem communication is not possible whilst communicating with the Handset Manager via the Infrared connection or USB cable.

Handset Manager

The Handset Manager is purchased separately.

You can transmit picture, sound and video clip, and Phonebook entries between your phone and your PC, and can use Phonebook entries on your PC.

To use the Handset Manager function, see "PC Software" on page 175 and set your phone to Data Transfer mode.

For details on software support, refer to the following site:

http://www.sharp-mobile.com

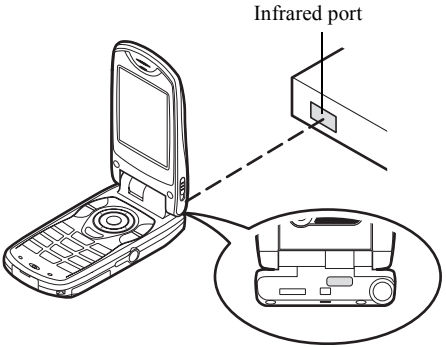
Software Installation

1. Insert the “Accessory CD” CD-ROM (purchase separately).
   The GX32 CD-ROM screen is displayed.
   If the GX32 CD-ROM screen is not displayed, double-click [Launcher.exe] in your CD-ROM.
2. Press the desired button.
   The installation starts.
3. Follow the on-screen instructions to complete installation.

Note

Infrared communication

- *Infrared ports need to be aligned with each other.*



- *Infrared ports need to be placed within 20 cm of each other and within a 30° angle.*
- *It is not recommended that you make or answer a call during data transmission. The operation may be interrupted.*

GSM/GPRS modem

- *It is not recommended that you make or answer calls when you are using GX32 as a GSM/GPRS modem. The operation may be interrupted.*
- *When transmitting data via infrared communication, you need to set the infrared setting to "On". (p. 171)*

Handset Manager

- *Some large files may not be able to be transmitted from the PC to the phone.*
- *When connecting your phone to a PC, you need to select the connection method for PC Link.*
- *You cannot read or write PC data (JPEG, MP3, 3gp, MPEG4, etc.) directly to the memory card inserted in the phone. Use a commercially available PC card adapter or memory card reader/writer to transfer data from the PC to the memory card.*
- *The phone may not recognize the USB data cable if it is connected whilst an application (Camera, My Stuff, MP3 Player, etc.) is running. Connect the USB data cable during stan-by.*
- *Applications (Camera, My Stuff, MP3 Player, etc.) do not run when the phone is connected to the PC by IrDA or USB data cable.*

Troubleshooting

Problem	Solution
The phone does not turn on.	• Make sure the battery is properly inserted and charged.
PIN code or PIN2 code is rejected.	• Make sure you have entered the correct code (4 to 8 digits). • Your SIM card/protected functions will become locked after 3 unsuccessful attempts. • Contact your SIM provider if you do not have the correct PIN code.
The SIM card becomes locked.	• Enter PUK code (8 digits) provided by your service provider (if supported). • If the attempt is successful, enter the new PIN code and confirm your phone is operational again. Otherwise contact your dealer.
The display is difficult to read.	• Adjust the backlight brightness for the main display, and adjust the LCD contrast for the external display.
Phone functions do not work after the phone is turned on.	• Check the radio signal strength indicator as you may be outside the service area. • Check to see if any error message is displayed when you turn your phone on. If so, contact your dealer. • Make sure the SIM card is correctly inserted.
Calls cannot be made or received.	• If the message “SIM Card Error” is displayed at start-up, you cannot use your SIM card or the SIM card is damaged. Contact your dealer or network service provider. • Check your call barring, fixed dialling setting, remaining battery and call forwarding settings. • Check if your phone is currently performing data communication using Infrared (IrDA) or a data cable. • Check the remaining balance if you are using a pre-paid SIM card.

Problem	Solution
Call quality is poor.	• Your current location may not provide good call quality (i.e., in a car or train). Move to a location where radio signal strength is greater.
Cannot access network service.	• Check where your account has been registered and where the service is available.
Cannot send or receive Text Message.	• Make sure you are correctly subscribed for the Short Message Service, that the network supports this service, and that the centre number is set up correctly. If not, contact your network service provider.
Cannot connect to Multimedia Message service provider.	• MMS settings and configuration may be missing or incorrect or the network does not support it. Check your service provider's access point number. Contact your service provider to confirm the correct settings.

Problem	Solution
Limited memory available.	• Delete any unnecessary data.
Call is terminated unexpectedly.	• Magnetised objects such as health necklaces placed near the phone may terminate the call. Keep your phone away from such objects.
No entries are displayed in the Phonebook	• Confirm that the source setting (Handset or SIM) and View Groups setting are made correctly.
Fax transmission failure	• Before transmitting fax data, configure your fax software to use the software flow control. • Use of the optional data cable is recommended for transmitting fax data.

Safety Precautions and Conditions of Use

Your phone conforms to international regulations insofar as it is used under normal conditions and in accordance with the following instructions.

CONDITIONS OF USE

Electromagnetic waves

- Do not switch on your phone aboard an aircraft (as your phone may interfere with the aircraft's electronic systems). Current legislation forbids this use and legal action can be taken against the user.
- Do not switch on your phone in a hospital, except in designated areas.
- Use of your phone's function may affect the performance of medical electronic units (pacemakers, hearing aids, insulin pumps, etc.). When the phone function is on, do not bring it near medical equipment or into areas in which medical equipment is being used. If you have a hearing aid or a pacemaker, only use the phone on the opposite side of your body from where it is located. The phone should be kept at least 6 inches (15.24 cm) from a pacemaker ANYTIME the phone is switched on.
- Do not switch on your phone near gas or flammable substances.
- Observe the rules concerning the use of mobile phones at gasoline stations, chemical plants and at all sites where a risk of explosion exists.

Caring for your phone

- Do not allow children to use your phone without supervision.
- Do not open or attempt to repair your phone yourself. The product can only be repaired by authorised service personnel.
- Do not drop your phone or subject it to severe impacts. Bending the body and pushing the display or keys with extreme force could damage the phone.
- Do not use solvents to clean your phone. Use only a soft, dry cloth.
- Do not carry your phone in your back pocket as it could break when you sit down. The display is made of glass and is particularly fragile.
- Avoid touching the external connector on the underside of the phone, since the delicate components within can be damaged by static electricity.

Battery

- Use your phone only with batteries, chargers and accessories recommended by the manufacturer. The manufacturer disclaims any liability for damage caused by the use of other chargers, batteries or accessories.
- **Network configuration and phone usage will affect talk-time and stand-by time.** Using the games or camera will hasten battery consumption.
- **When the battery charging alert is displayed on the screen, charge the battery as soon as possible.** If you continue using your phone ignoring the alert, the phone may cease to function, and all data and settings you have stored may be lost at any moment.
- Before removing the battery from the phone, make sure the phone is switched off.
- Replace and charge the new battery as soon as possible after removing the old one.
- Do not touch the battery terminals. Batteries can cause damage, injury or burns if a conductive material touches exposed terminals. When the battery is detached from the phone, use a cover made of non-conductive material for keeping and carrying the battery safely.
- Recommended temperature for using and storing batteries is approximately 20°C.
- The batteries' performance is limited in low temperatures, particularly below 0°C and the phone may not work temporarily regardless of the amount of remaining battery power.
- Exposing the phone to extreme temperatures will shorten battery life.
- The battery can be charged and discharged hundreds of times but it will eventually wear out. When the operating time (talk-time and stand-by time) is noticeably shorter than normal, it is time to buy a new battery.

CAUTION

RISK OF EXPLOSION IF BATTERY IS REPLACED
BY AN INCORRECT TYPE,
DISPOSE OF USED BATTERIES ACCORDING
TO THE INSTRUCTIONS

See "Battery Disposal" on page 15.

Memory Card

- Do not remove or insert a memory card whilst data on the card is being edited. Do not turn off the handset or device containing the memory card whilst data on the card is being edited as this may damage the data or cause the card to stop functioning correctly.
- Data maybe lost under the following circumstances.
  - If the handset is dropped, or shook, or force is applied whilst the memory card is inserted.
  - When the handset is used in areas that are exposed to static electricity or electric noise.
- Backup your important data in case data on the SD cards are lost due to malfunctions.
- Do not touch the metal terminals with your hands or metal objects.
- Do not bend the memory card or subject it to violent impact. Keep it away from water and high temperatures.
- SHARP holds no responsibility for the loss or damage of data contained on a memory card.
- Keep all memory cards out of the reach of small children.

Aerial Care

- Do not touch the aerial unnecessarily, whilst using the mobile phone. If it is held, call quality may be hindered leading to shortened talk-time and stand-by time because the mobile phone may have to operate on a higher power level than is necessary.
- Use only the aerial supplied or one approved by Sharp for your mobile phone. Using unauthorised or modified aerials may damage the mobile phone. Moreover, since the mobile phone may violate the appropriate regulations, it may lose performance and exceed the limitation of SAR levels.
- To avoid impaired performance, do not damage the aerial of the mobile phone.
- Whilst talking directly to the microphone, please hold the mobile phone so that the aerial is upwards over your shoulder.
- To avoid interfering with blasting operation, please turn off the mobile phone in a blasting area or in a place where a “turn off two-way radio” sign is posted.

Camera Operation

- Learn picture quality, file formats, etc. beforehand.
  The display supports up to 262,144 colours.
  The taken pictures can be saved in JPEG format.
- Be careful not to move your hand whilst taking pictures.
  If the phone moves whilst taking a picture, the picture can be blurred. When taking a picture, hold the phone firmly to prevent it from moving, or use the delay timer.
- Clean the lens cover before taking a picture.
  Fingerprints, oils, etc. on the lens cover hinder clear focusing. Wipe them off with a soft cloth before taking a picture.

Others

- As with any electronic storage unit, data may be lost or corrupted under various circumstances.
- Before connecting the phone with a PC or a peripheral unit, read the operation manual for the other unit carefully.
- If the phone's battery has been removed for some time, or the phone has been reset, the unit's clock and calendar may be reinitialised. The date and time should be updated in this case.
- Use only the attached handsfree. Some phone's functions may not work when unauthorised hands free are used.
- The phone uses the magnet to recognise that the phone is closed. Do not place magnetic cards near your phone or get the card caught in the phone as it may damage the recorded data.
- Do not flash the mobile light into eyes as this may damage eyesight or cause dizziness leading to accidents or injury.

ENVIRONMENT

- Keep your phone away from extreme heat. Do not leave it on the dashboard of a car or near a heater. Do not leave it in any place that is extremely damp or dusty.
- Since this product is not waterproof, do not use it or store it where fluids such as water can splash onto it. Raindrops, water spray, juice, coffee, steam, perspiration, etc. will also cause a malfunction.

PRECAUTIONS CONCERNING VEHICLE USE

- It is the user's responsibility to verify if local laws permit the use of a mobile phone in a vehicle. Give full attention to driving. Pull off onto the side of a road and park the car before making or answering a call.
- If local laws permit, we recommend that you use your phone with the attached handsfree.
- Use of your phone's function may interfere with the vehicle's electronic systems, such as the ABS anti-lock brakes or the air-bag. To ensure no such problem occurs, please check with your dealer or car manufacturer before connecting your phone.
- Only allow qualified service maintenance personnel to install the vehicle accessories.

The manufacturer disclaims any liability for damage which may result as a consequence of improper use or use contrary to the instructions contained herein.

SAR

Your Sharp mobile phone has been designed, manufactured and tested so as not to exceed the limits for exposure to electromagnetic fields recommended by the Council of the European Union. These limits are part of comprehensive guidelines developed by independent scientific organisations. The guidelines include a substantial safety margin designed to assure the safety of the phone user and others and to take into account variations in age and health, individual sensitivities and environmental conditions. European standards provide for the amount of radio frequency electromagnetic energy absorbed by the body when using a mobile phone to be measured by reference to the Specific Absorption Rate (SAR). The SAR limit for the general public is currently 2 watts per kilogram averaged over 10 grams of body tissue. Your Sharp mobile phone SAR value is 0.377 watts per kilogram. This has been tested to ensure that this limit is not exceeded even when the phone is operating at its highest certified power. In use however your Sharp mobile phone may operate at less than full power because it is designed to use only sufficient power to communicate with the network.

PRECAUTIONS FOR USE IN USA

FCC Declaration of Conformity

This mobile phone GX32 with PC/Data interface cable XN-1DC30 complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

Responsible Party:

FOR HOME OR OFFICE USE

FCC Notice

The phone may cause TV or radio interference if used in close proximity to receiving equipment. The FCC can require you to stop using the phone if such interference cannot be eliminated.

Information To User

This equipment has been tested and found to comply with the limits of a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation; if this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient/Relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

CAUTION: Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

Exposure to Radio Waves

THIS MODEL PHONE MEETS THE GOVERNMENT'S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES.

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg.* Tests for SAR are conducted using standard operating positions specified by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 0.552 W/kg and when worn on the body, as described in this user guide, is 0.706 W/kg. Body-worn Operation; This device was tested for typical body-worn operations with the back of the phone kept 1.5 cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5 cm separation distance between the user's body and the back of the phone. The use of belt-clips, holsters and similar accessories should not contain metallic components in its assembly.

The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided. While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF emission guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/oet/fccid after searching on FCC ID APYHRO00033.

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) web-site at http://www.phonefacts.net.

* In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

Out of Warranty List

This limited warranty shall not apply in respect of the following:

(i) Any deterioration due to normal wear and tear including all plastic surfaces and all other externally exposed parts that are scratched or damaged due to normal customer use.

(ii) Defects caused by the Product being subjected to any of the following: use in contradiction with the user guide, rough handling, exposure to moisture, dampness or extreme thermal or environmental conditions or rapid changes in such conditions, corrosion, oxidation, unauthorised modifications or connections, unauthorised opening or repair, repair by use of unauthorised spare parts, misuse, improper installation, accident, forces of nature, spillage of food or liquid, influence from chemical products or other acts beyond Sharp's reasonable control (including but not limited to lifetime, and breakage of or damage to antennae) unless the defect was caused directly by defects in materials or workmanship.

(iii) Products in respect of which the product serial number or the IMEI number has been removed, erased, defaced, altered or made illegible.

(iv) Defects caused by the fact that the Product was used with or connected to a products or an accessory not manufactured or supplied by Sharp or was used other than for its intended use.

(v) Defects caused by a defective function of the cellular network.

(vi) Defects caused by the fact that the battery was short-circuited or seals of the battery enclosure or cells were broken or show evidence of tampering or the battery was used in equipment other than for which it has been specified.

(vii) Defects caused by the need to upgrade Products software due to changes in cellular network parameters.

(viii) Products operated outside published maximum ratings.

(ix) Products rented on a monthly basis.
