

## Contacts List

Handset Manager combines your handset Phone Book and Outlook / Outlook Express Contacts into a single up-to-date Phone Book. Synchronize your handset Phone Book and Outlook / Outlook Express Contacts to have the accurate Phone Book database on hand. Phone Book allows you to keep yourself on track all the time and ahead of others. Follow the easy steps to edit and backup personal phone book and then update to handset.

Click **OK** and Handset Manager will download the phone book of the handset to the PC right away.

Handset Manager will download Phone Book from SIM Memory and Handset Memory.

## Synchronize Outlook / Outlook Express Contacts and handset Phone Book:

When you finish editing handset Phone Book, click to synchronize your handset Phone Book with Outlook / Outlook Express Contacts.

You can also click on the main menu to choose **SyncPhone Book**: to synchronize handset Phone Book with Outlook or Outlook Express Contacts.

row: Select this contact in Outlook and entry in handset Phone Book by checking . Do not choose this contact in Outlook and entry in handset Phone Book by unchecking .

row: All of Outlook Phone Book Contacts.

row: Select Contacts in Outlook/Outlook Express and entries in handset Phone Book. Choose to overwrite Outlook/Outlook Express Phone Book contact to the entry in handset Phone Book.  means the handset entry and Outlook/Outlook Express Phone Book contact are

identical and have been synchronized previously.  means write to Outlook/Outlook Express Contacts.

row: Handset Phone Book entries.

row: Remarks of Outlook/Outlook Express Contacts and handset Phone Book entries.

	Contacts in Outlook		Entry in handset	Remark
<input checked="" type="checkbox"/>	Mandy	<input checked="" type="checkbox"/>		Delete the item in Outl
<input checked="" type="checkbox"/>	Sandy	<input checked="" type="checkbox"/>	Sandy	Identical
<input checked="" type="checkbox"/>	John	<input checked="" type="checkbox"/>		Write to phone
<input type="checkbox"/>		<input checked="" type="checkbox"/>	Tracy	Item not selected

Outlook: 0 Modified 5 Added 1 Deleted

Handset Manager: 0 Modified 1 Added 1 Deleted

After the handset Phone Book and the Outlook / Outlook Express Contacts are synchronized using Handset Manager, you can select the items which will be written to both Outlook / Outlook Express and the handset. Please note: If the Outlook / Outlook Express is connected to Exchange Server, you need to log in to the Exchange Server in order to synchronize with Outlook / Outlook Express Contacts. After you are

done, please select **OK**. Finally, click  to write the Phone Book entries to the handset.

#### Note:

1. Synchronization operation of this software will change contents both in the Outlook / Outlook Express Contacts and the handset Phone Book. Any modification done to the handset Phone Book will affect the selected Outlook / Outlook Express Contacts. If you only wish to write the Outlook / Outlook Express Contacts information to the handset without modifying or deleting Outlook / Outlook Express contents, when Outlook / Outlook Express Contacts are selected to the Handset Manager, please select Synchronize again, uncheck all of the selected Outlook / Outlook Express Contacts on the above screen.
2. There is a huge difference between the data fields of the handset phone book and Outlook / Outlook Express Contacts. Handset Manager is doing the best to fit all the data fields. However, some synchronized data fields such as Address and Name may not turn out to be expected. If you feel the results did not meet your expectation, you can uncheck the Outlook / Outlook Express items and edit by themselves.
3. The number of characters that can be input to the handset Phone Book is limited, Handset Manager will automatically truncate the characters of the Outlook / Outlook Express Contacts.

### Using Import / Export Function:

Import/Export function of the Handset Manager makes it easy for users to convert the address book data from Outlook, Outlook Express, and Palm Pilot, and save it in the Handset Manager data format. The most important thing is that you must create a common data file format that is compatible with Outlook, Outlook Express, Palm Pilot, and Handset Manager. This file format is called CSV (Comma Separated Values) file format. First, export the address book of the Outlook, Outlook Express, and Palm Pilot in the CSV (Comma Separated Values) format by selecting Export. Second, select Import function of the Handset Manager to import data in the CSV (Comma Separated Values) format. Users can choose the desired items and save them to the mobile phone.

Step 1 -- Export data from the contact management software

Example 1 -- Export data from the Microsoft Outlook Express

Select Addresses on the Outlook Express window, the Address Book window will pop up. Select the File->Export->Other Address Book..., then you will see the Address Book Export Tool. Select Text File (Comma Separated Values) then click Export button. Enter the file name you want to save as, and click Next. In the "Select the fields you wish to export", you may select all fields. Click Finish to complete exporting data.

Example 2 -- Export data from the Palm Pilot

Select Address from Palm Pilot window. On the address book, please create a new entry with first name as 0000Name1, last name as 0000Name2, and enter "Office" in the Work field, "Fax" in the Fax field, "E-mail" in the E-mail field, and so on. It is because the Export function of Palm does not indicate "field name" on top of the created CSV file. Those fields are necessary in locating the corresponding fields. Select the File->Export... from Address Book window, then Export to File window will pop up. Select Comma Separated (\*.csv, \*.txt) under the Export as:, and enter its destination file name, then click Export. On the "Specify Export Fields", you may select all fields. Click OK to complete the export process.

Step 2 -- Import data to Handset Manager

From Phone Book of Handset Manager, select File->Import..., then open the created CSV file. The Choose imported fields dialog box will pop up. The left side is the text field of the CSV file, while the right side is the corresponding fields under the Handset Manager phone book entries. Double-click any item on the box to start finding the corresponding fields. When this is completed, click OK to start the Import. The following is an example on how users can find out the corresponding fields of CSV file and import them to the Handset Manager.

First Name: Charlie --> corresponds to Name  
Last Name: Wu --> corresponds to Name1  
Company Name: ( AA Tech ) --> corresponds to Name2  
Title: Sales --> corresponds to Note1  
Birthday: 1960-1-1 --> corresponds to Note2

The phone book entry would be:

Name: Charlie Wu (AA Tech )  
Note: Sales 1960-1-1

These are rules when using Import function:

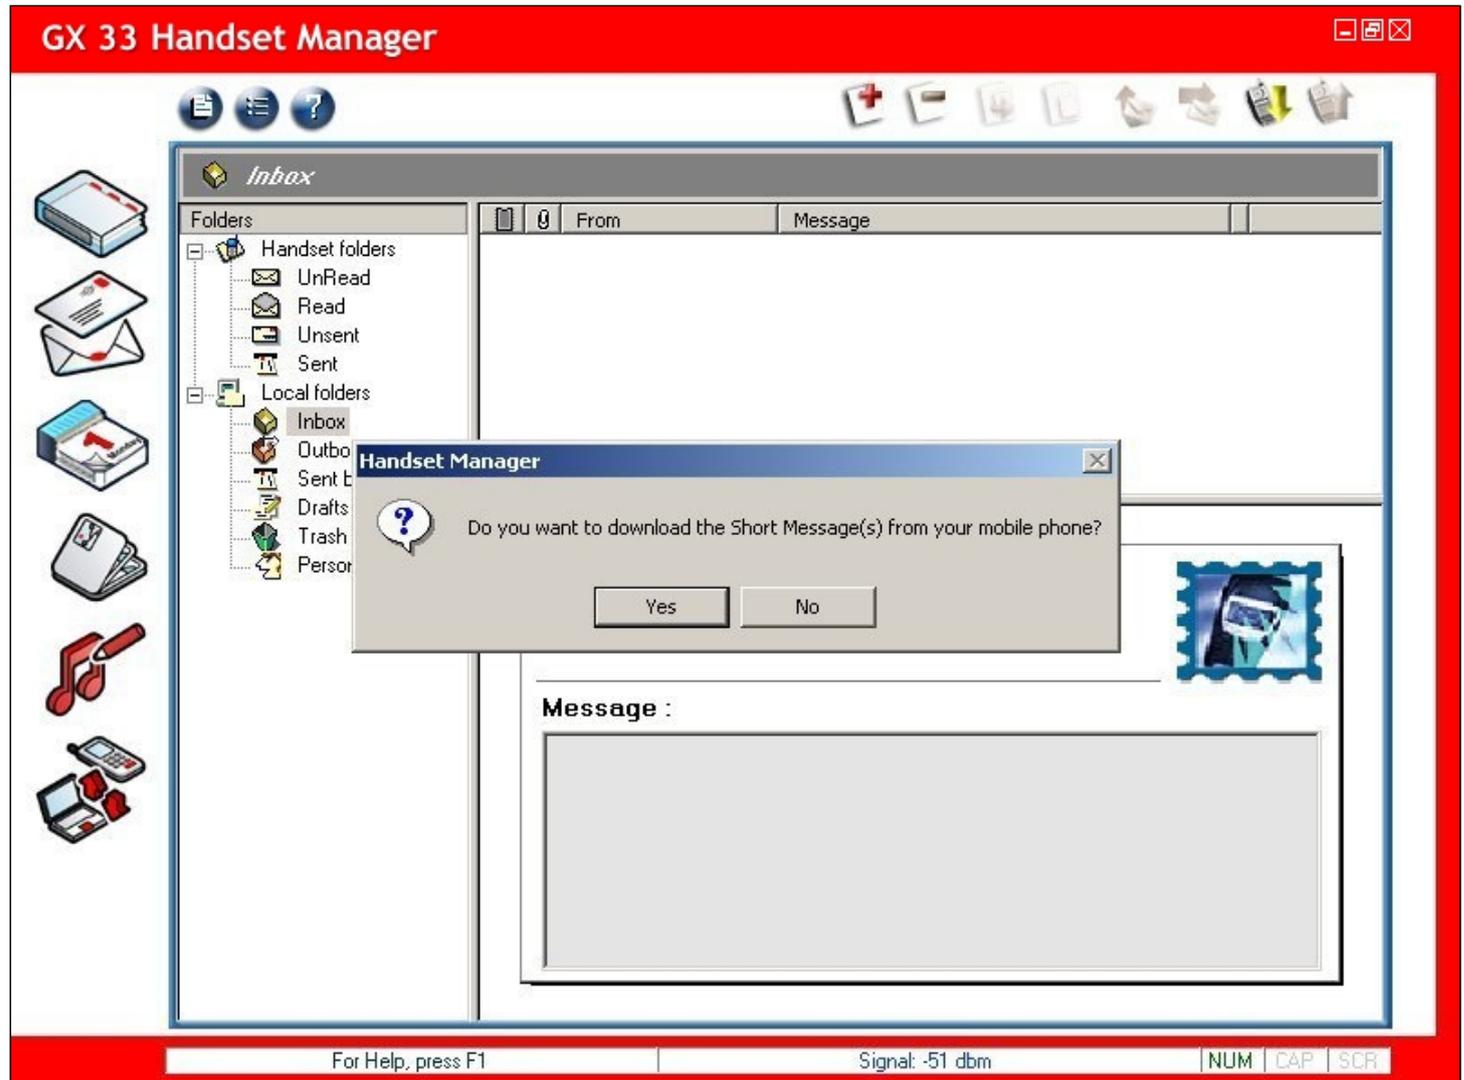

The program will search each field and combine all the non-empty fields and add a space to separate each field.

The search process will follow the order of Name>Name1>Name2>Name3, Note>Note1>Note2>Note3, and Postal Address>Postal Address1>Postal Address2>Postal Address3.

If the combined fields exceed the character limit of the phone book entries, the software will truncate it automatically.

## SMS Message

Sending SMS messages using Handset Manager is as easy as a few clicks. Entering text on the extremely inconvenient keypads is not the only option anymore. SMS Message frees you from painstakingly inputting text on the keypads. Create personal folders and categorize your messages so that you always know where your messages are kept. All of your messages are easily accessible and well-organized.

Handset Manager will download Short Messages from your phone.

### Work with SMS messages in the Local folders.

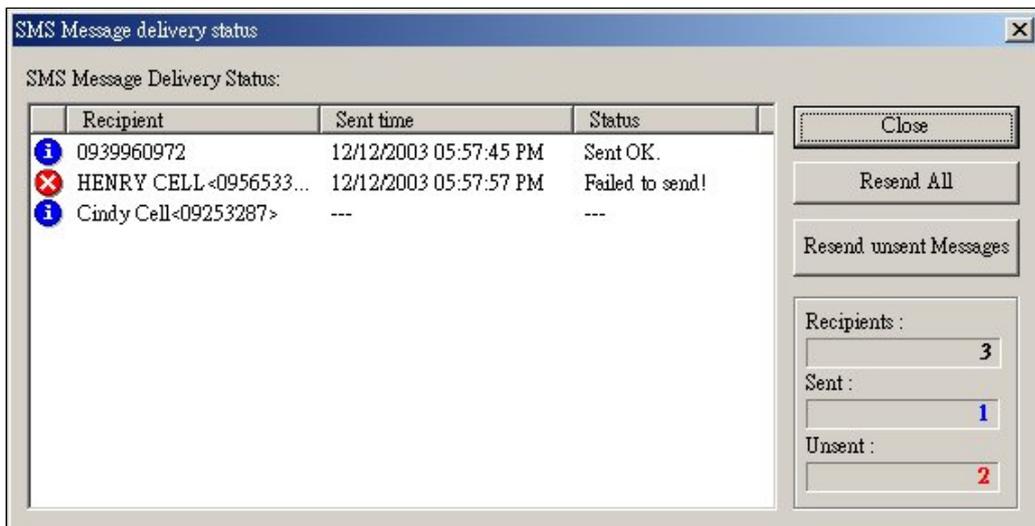

Simply choose a SMS message and right-click to bring up the pop-up menu or click on the icon of the menu toolbar.  will be enabled when there are SMS messages in Outbox folder.

### Details of SMS Message delivery status:

View SMS message delivery status. You can choose to resend to all of the recipients or resend unsend messages if any problem occurs during message delivery.

### Edit SMS messages:

**Save message:** Save to the selected folder.

**Print:** Print message content.

**Cut:** Cut message content.

**Copy:** Copy message content.

**Paste:** Paste message content.

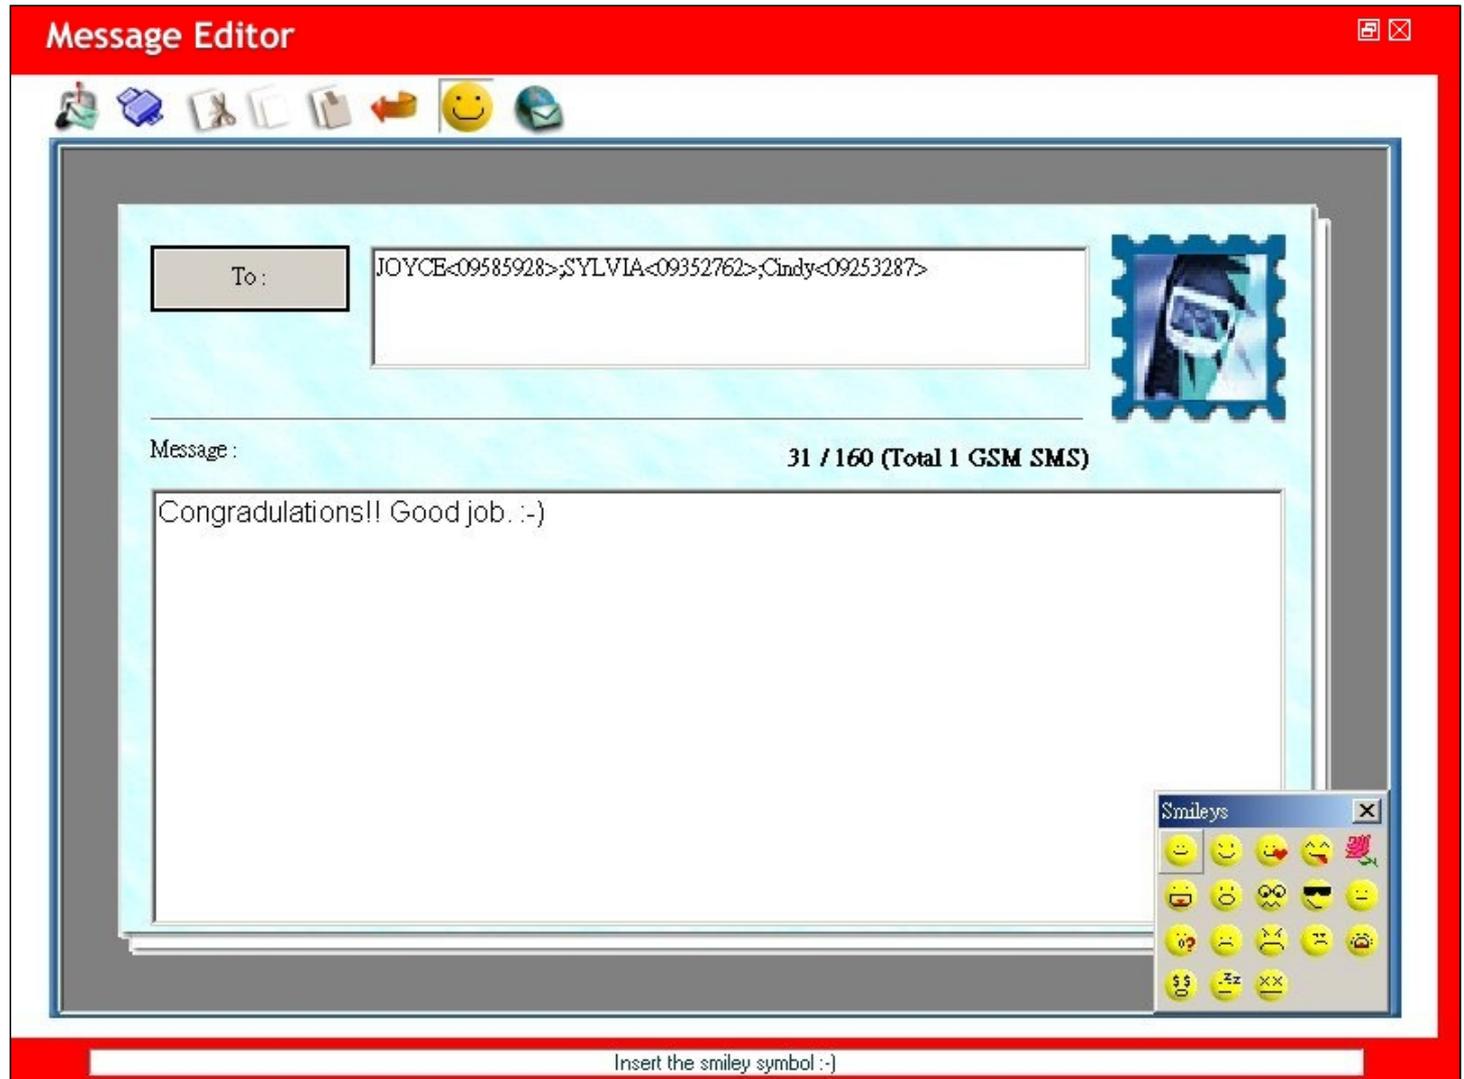

**Undo:** Undo previous action.

**Smileys:** Insert Smileys to message content.

**Send Message:** Send message by handset.

## Edit SMS messages:

Click  to compose a new SMS message. Click  to select recipients from Phone Book or enter the mobile phone number. Enter the text message and insert smileys to your message content.

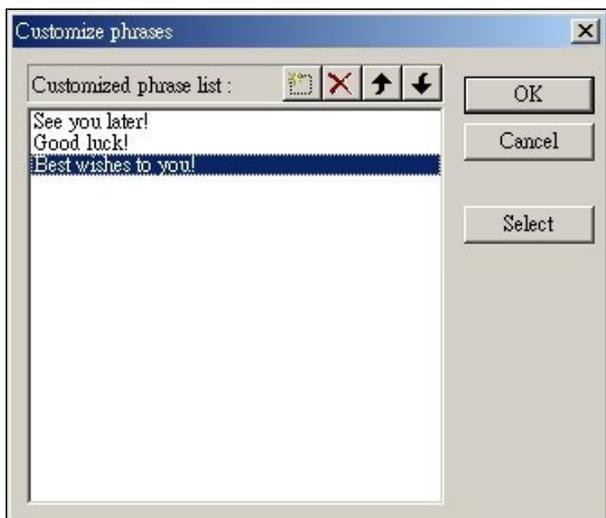

## Add customized phrases:

Right-click on the message column and choose **Customize phrases**.

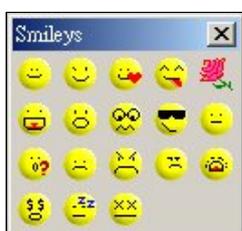

-  **New phrase:** Add new phrases.
-  **Delete phrase:** Delete phrases.
-  **Move up:** Move phrases up on the list.
-  **Move down:** Move phrases down on the list.

Add the most commonly used phrases and move them to the top of the list.

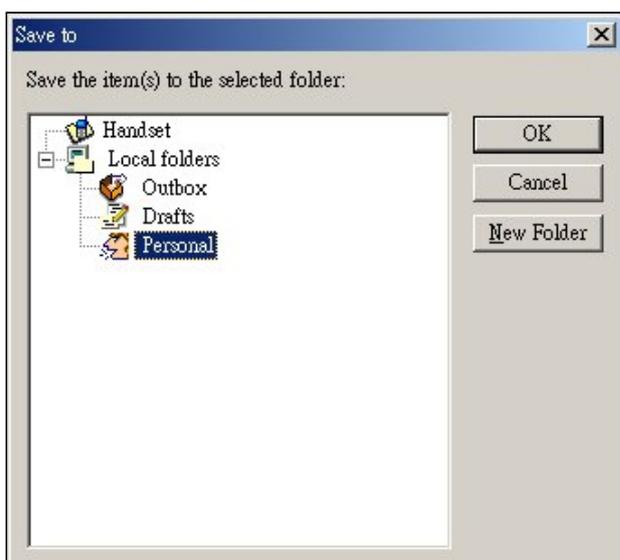

### Add smileys:

Select  to add emotions and smileys to your message content.

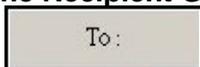

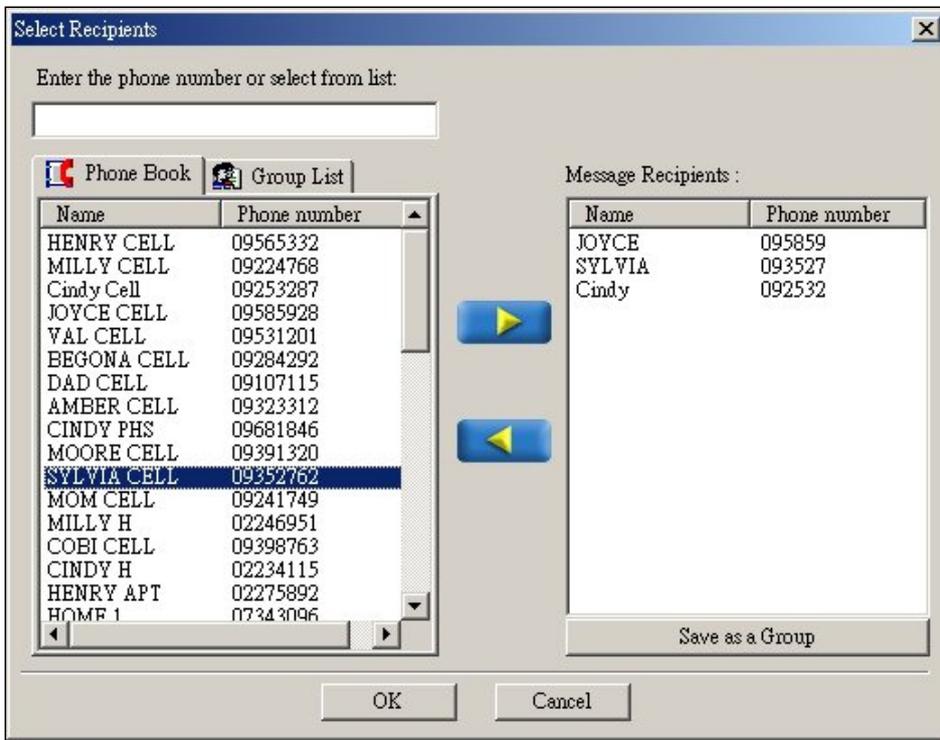

### Save SMS messages:

You can create or delete subfolders under **Personal Folder** by right-clicking on the Personal folder and choose **New Folder**. To save SMS messages, select  to save the item to the selected folder.

### Define Recipient Groups:

Click  to select **Recipients**. You will be able to categorize different Recipient Groups for your convenience. Select Phone entries and click  to add to the **Message Recipients** column. Click **Save as a Group** when you are done.

Enter the Group name.

### Send SMS messages:

When you finish editing SMS messages, click  to send SMS messages. The message will be sent to the Recipient Group that you choose. You will be able to view the progress of the mail sending status.

# SyncCalendar

SyncCalendar helps you manage and prioritize all of the important events in your life so that you will not miss important meetings, a date or even birthday of your love ones. SyncCalendar works like your personal secretary that takes care of everything and takes you ahead of everyone. When you use SyncCalendar, you can take advantage of the Outlook Calendar selection criteria to schedule both your handset and Outlook Calendar to the period you wish to synchronize. SyncCalendar combines Microsoft Outlook and handset calendar to give you a richer life.

Before you start to use SyncCalendar, you must have Microsoft Outlook installed on your PC. SyncCalendar allows you to synchronize the information of Outlook Calendar to handset calendar selectively. The information of the handset Calendar will be saved unless deleted manually so that your handset calendar will have the up-to-date and correct information all the time.

First, please synchronize the time of PC and the handset before you select SyncCalendar. You will be asked if you want to download Calendar from the handset and the PC. Please click **OK**. You can choose  to synchronize Outlook and handset Calendar items.

## Edit Calendar:

-  **Option:** Option menu contains **Select Sync Folder** and **SyncCalendar Setup**.
-  **Update to handset and Outlook:** Update to handset and Outlook.
-  **Sync:** Synchronize Outlook and Handset Calendar items.

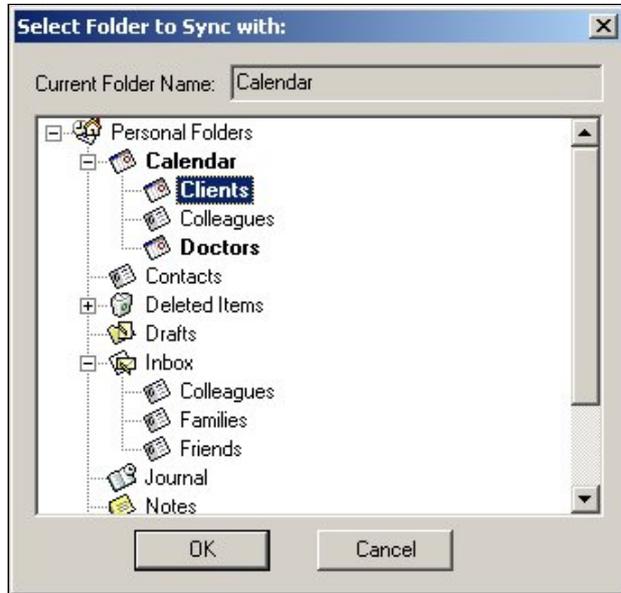

## Choose options:

Click  on the main menu.

Choose:  
**Select Sync Folder:** Select a specific folder from Outlook to synchronize with handset Calendar items.  
**SyncCalendar Setup:** Choose the period of time that you want to synchronize Outlook Calendar with.

### Select Sync Folder:

Click  and choose **Select Sync Folder**. Select a folder from Outlook to synchronize with handset Calendar items.

### Work with Outlook and handset Calendar items:

row:

- : The item is not selected to be synchronized.
- : The item is selected to be synchronized.

 row: Subject, Start Time and Alarm Time of selected Outlook Calendar items.

 row: Choose to delete or keep handset Calendar items.

- : The item is not selected.
- : Replace the handset data with data of Outlook, or delete the handset data.
-  means handset and Outlook Calendar have the identical items that have been synchronized previously.
- : Replace the data of Outlook with the handset data, or delete the data of Outlook.

 row: Subject, Start Time and Alarm Time of selected handset Calendar items.

 row: Remarks for actions and status of Outlook and handset Calendar items.

When you are done, you must choose  to write the Calendar items to the handset Calendar.

Calendar	Items in Outlook	Start Time	Alarm Time	Items in handset	Start Time	Alarm Time	Remark
<input checked="" type="checkbox"/>	sales meeting	2004/07/1...		Marcom meeting	2004/01/0...		Delete the entry in Phone
<input type="checkbox"/>	project review	2004/07/2...		Go to dentist	2004/01/1...		Item not selected
<input checked="" type="checkbox"/>	go to dentist	2004/07/2...					Write to phone
<input checked="" type="checkbox"/>	project review	2004/08/0...		go to dentist	2004/07/2...		Item not selected
<input checked="" type="checkbox"/>	company trip	2004/08/1...	2004/08/16 09:15	pick up Mary	2004/07/2...		Identical

NUM | CAP | SCR

## Note:

- When there are a lot of items to be written to the handset, Handset Manager will automatically choose a number of Outlook Calendar items to handsets based on different handset models, total capacity of the handset Calendar, and reserved items for user input.
- You are allowed to setup recurring appointments in the Outlook Calendar. However, there are many different forms of recurring appointments of Outlook Calendar that may not be accepted by the handset. Therefore, Handset Manager will transform the recurring appointments of the Outlook Calendar to several non-recurring appointments and write to the handset.
- The number of characters and character format that can be saved in the handset Calendar are different from handset to handset. For example, some handsets do not accept the character format in Traditional Chinese. SyncCalendar will automatically truncate the characters before saving to the handset.

## Setup Outlook Calendar Selection Criteria:

Click  and choose **SyncCalendar Setup**.

If you choose **This Week** as your **Begin date** and **This Month** as your **End date**. The **Outlook Calendar Selection Criteria** begin on the Sunday of this week and ends on the last day of this month.

**Outlook Calendar Selection Criteria** X

Only include Calendar items between:

Begin date :  OK

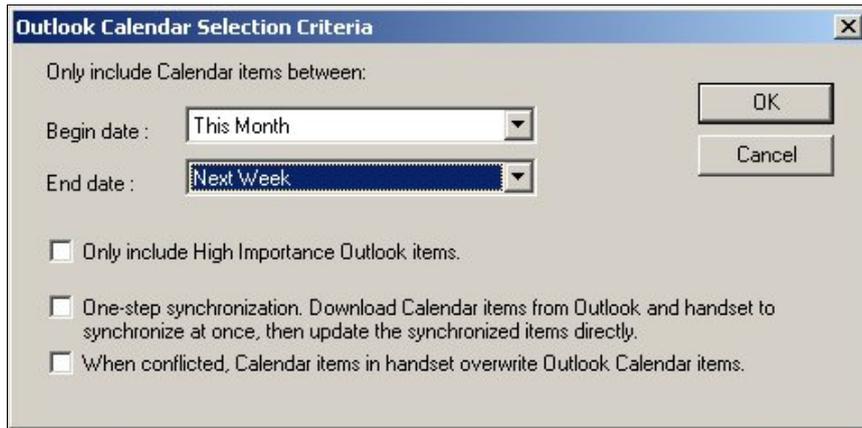

End date :  Cancel

Only include High Importance Outlook items

One-step synchronization. Download Calendar items from Outlook and handset to synchronize at once, then update the synchronized items directly.

When conflicted, Calendar items in handset overwrite Outlook Calendar items.

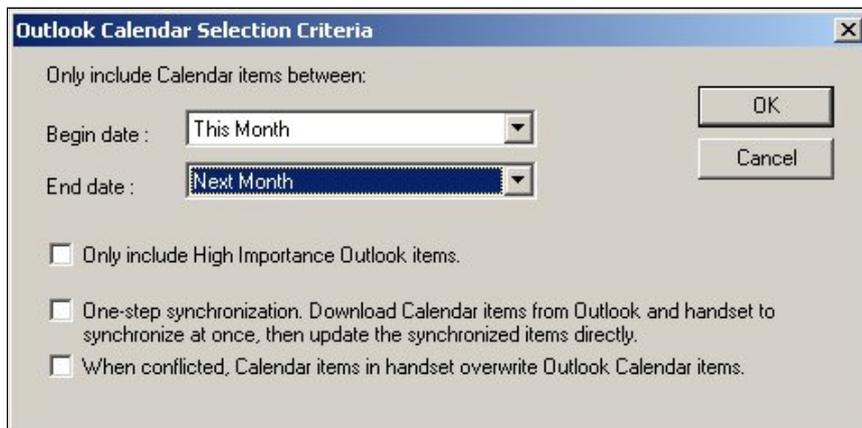

If you choose **This Month** as your **Begin date** and **Next Week** as your **End date**. The **Outlook Calendar Selection Criteria** begin on the first day of this month and ends on Saturday of next week.

The screenshot shows a dialog box titled "Outlook Calendar Selection Criteria" with a close button (X) in the top right corner. The text "Only include Calendar items between:" is followed by two dropdown menus. The first dropdown, labeled "Begin date:", has "This Month" selected. The second dropdown, labeled "End date:", has "Next Week" selected. To the right of these dropdowns are "OK" and "Cancel" buttons. Below the dropdowns are three unchecked checkboxes with the following text:

- Only include High Importance Outlook items.
- One-step synchronization. Download Calendar items from Outlook and handset to synchronize at once, then update the synchronized items directly.
- When conflicted, Calendar items in handset overwrite Outlook Calendar items.

If you choose **This Month** as your **Begin date** and **Next Month** as your **End date**. The **Outlook Calendar Selection Criteria** begin on the first day of this month and ends on the last day of next month.

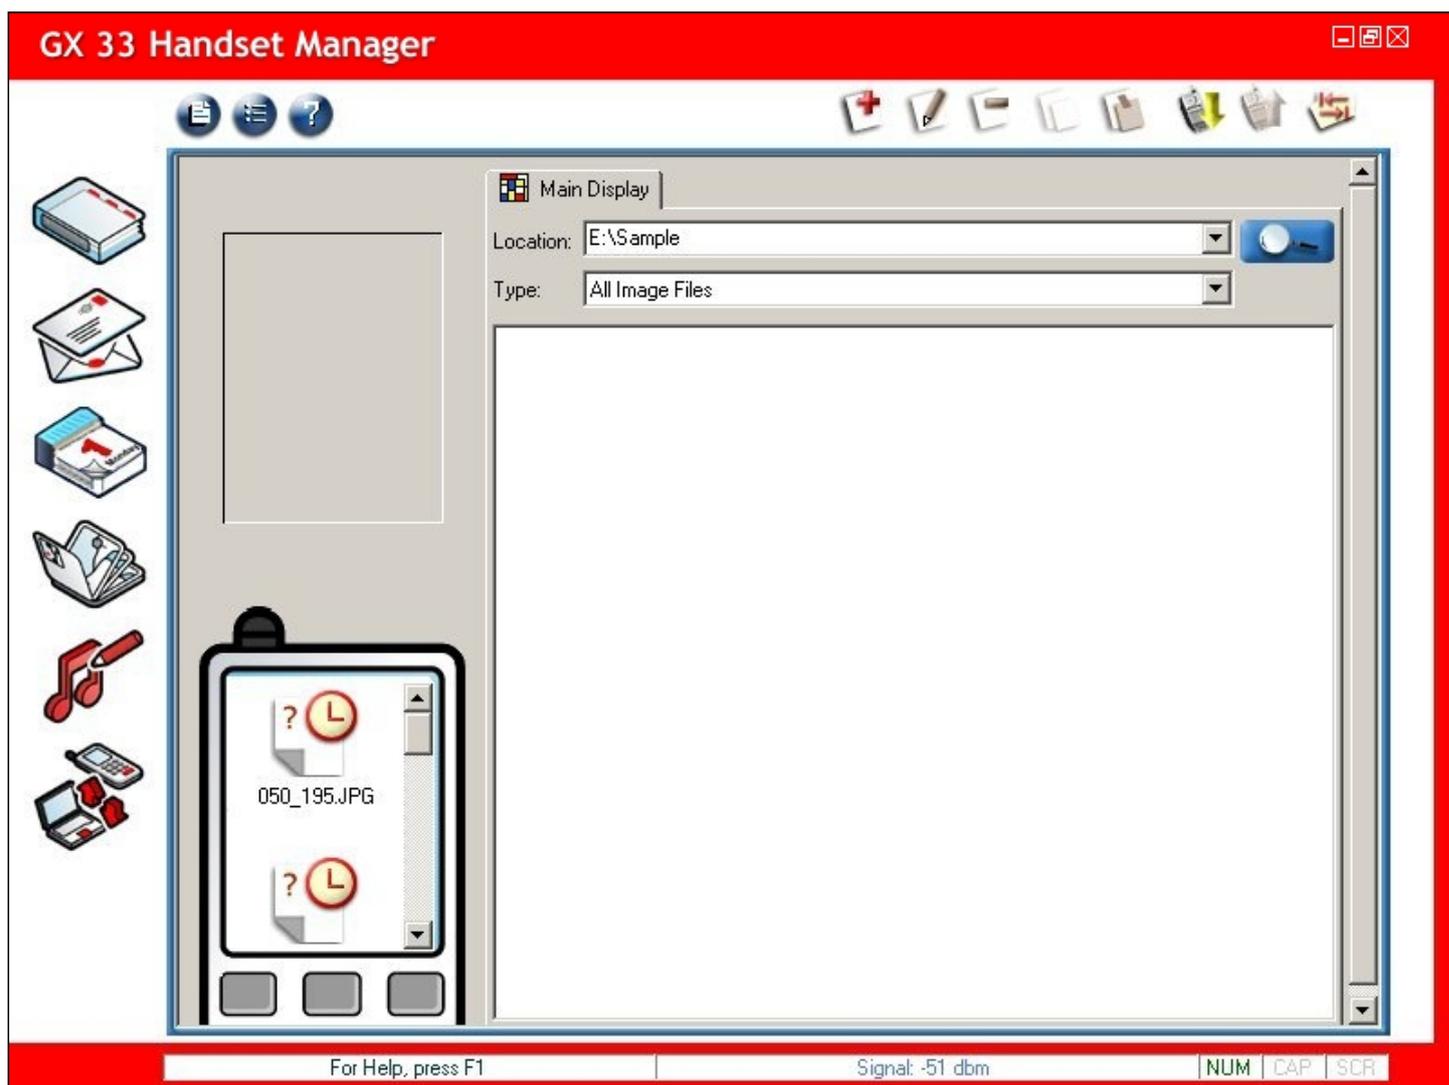

The screenshot shows a dialog box titled "Outlook Calendar Selection Criteria" with a close button (X) in the top right corner. The text "Only include Calendar items between:" is followed by two dropdown menus. The first dropdown, labeled "Begin date:", has "This Month" selected. ## Photo Album

Album allows you to create picture images on the PC then upload to the phone and show what you can't describe by words. Take advantages of the new features provided by Handset Manager to personalize your mobile phone. A library with clip arts, frames, and masks is available for you to choose from and create your own unique pictures to share with your friends and families. You can even remove the background of your picture to show the most interesting area that you want to share. Preview the picture to see how it looks on the handset. All it takes is just a few clicks and you will become an artist.

Click  to choose the picture that you have saved in the PC.

Album allows you to view pictures and how the pictures look like on the handset in the upper-left corner of the screen.

### Edit Picture:

-  **New:** Create new picture.
-  **Edit:** Edit the picture.
-  **Delete:** Delete the picture.
-  **Copy:** Copy the picture.
-  **Paste:** Paste the picture.
-  **Download from handset:** Download the picture from handset.
-  **Update to handset:** Update the picture to handset.
-  **Refresh folder:** Refresh folders.

### Compose color pictures:

Click  to compose color picture.

**Save and Exit:** Save your picture and exit this window.

**Freeze Selection Area:** Freeze selection area on the canvas.

**Reset Selection Area:** Reset Selection Area on the canvas.

**Text:** Type text on the Text Input window and drag and drop the text to desired location on the picture.

**Pencil:** Draw lines on the image object.

**Pencil width:** Choose pencil width.

**Pencil color:** Choose pencil color.

**Copy:** Copy the image object.

**Paste:** Paste the image object.

**Delete:** Delete the image object.

**Upper level:** Move the image object to an upper level.

**Lower level:** Move the image object to a lower level.

**Top level:** Move the image object to top level.

**Bottom level:** Move the image object to bottom level.

**Rotate:** Rotate the image object.

**Mirror:** Arrange image object reversely.

**Undo:** Undo previous action.

**Redo:** Redo previous action.

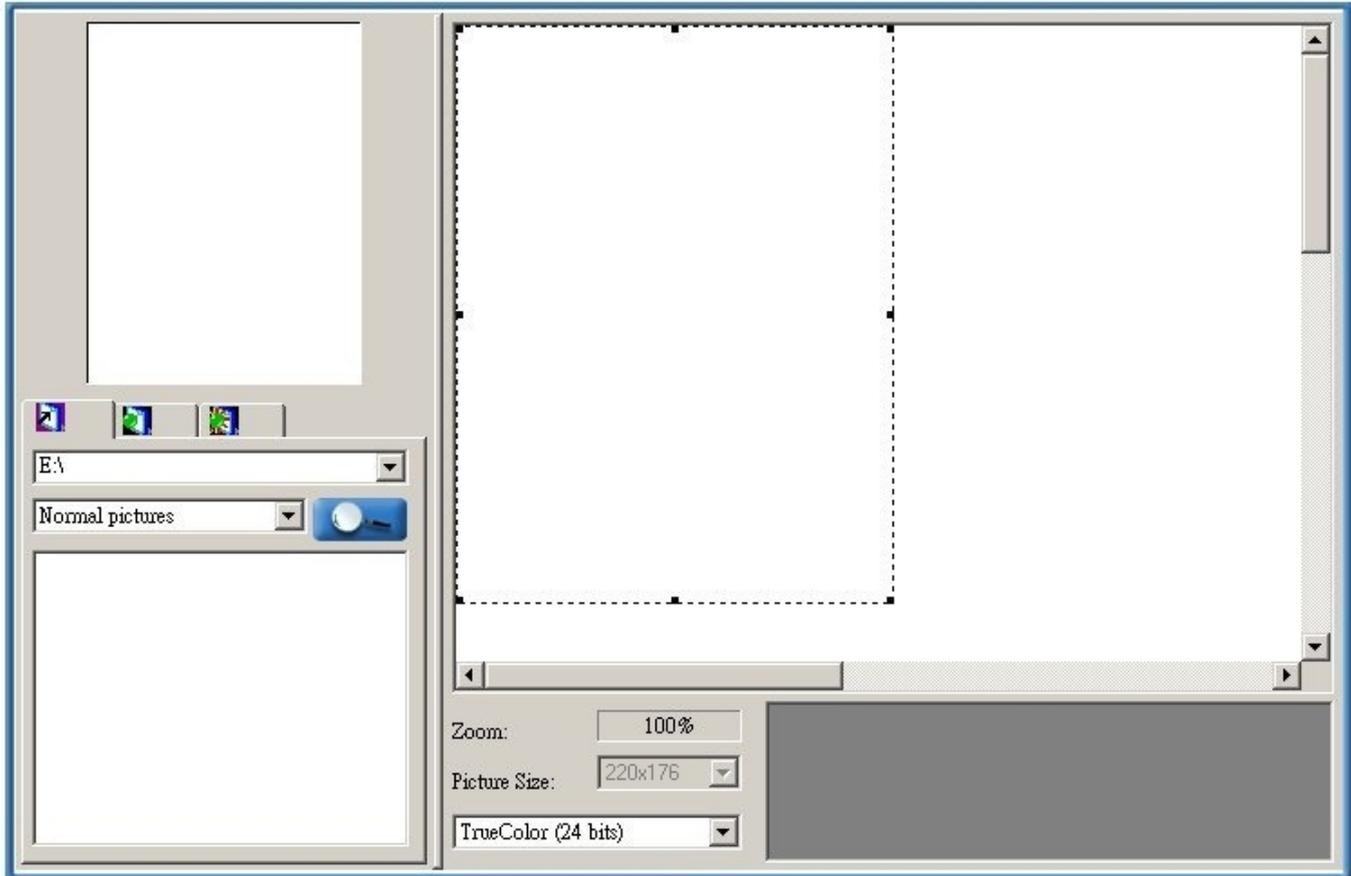

**Remove Background:** Remove background of the selected object.

**Update:** Update the picture to handset.

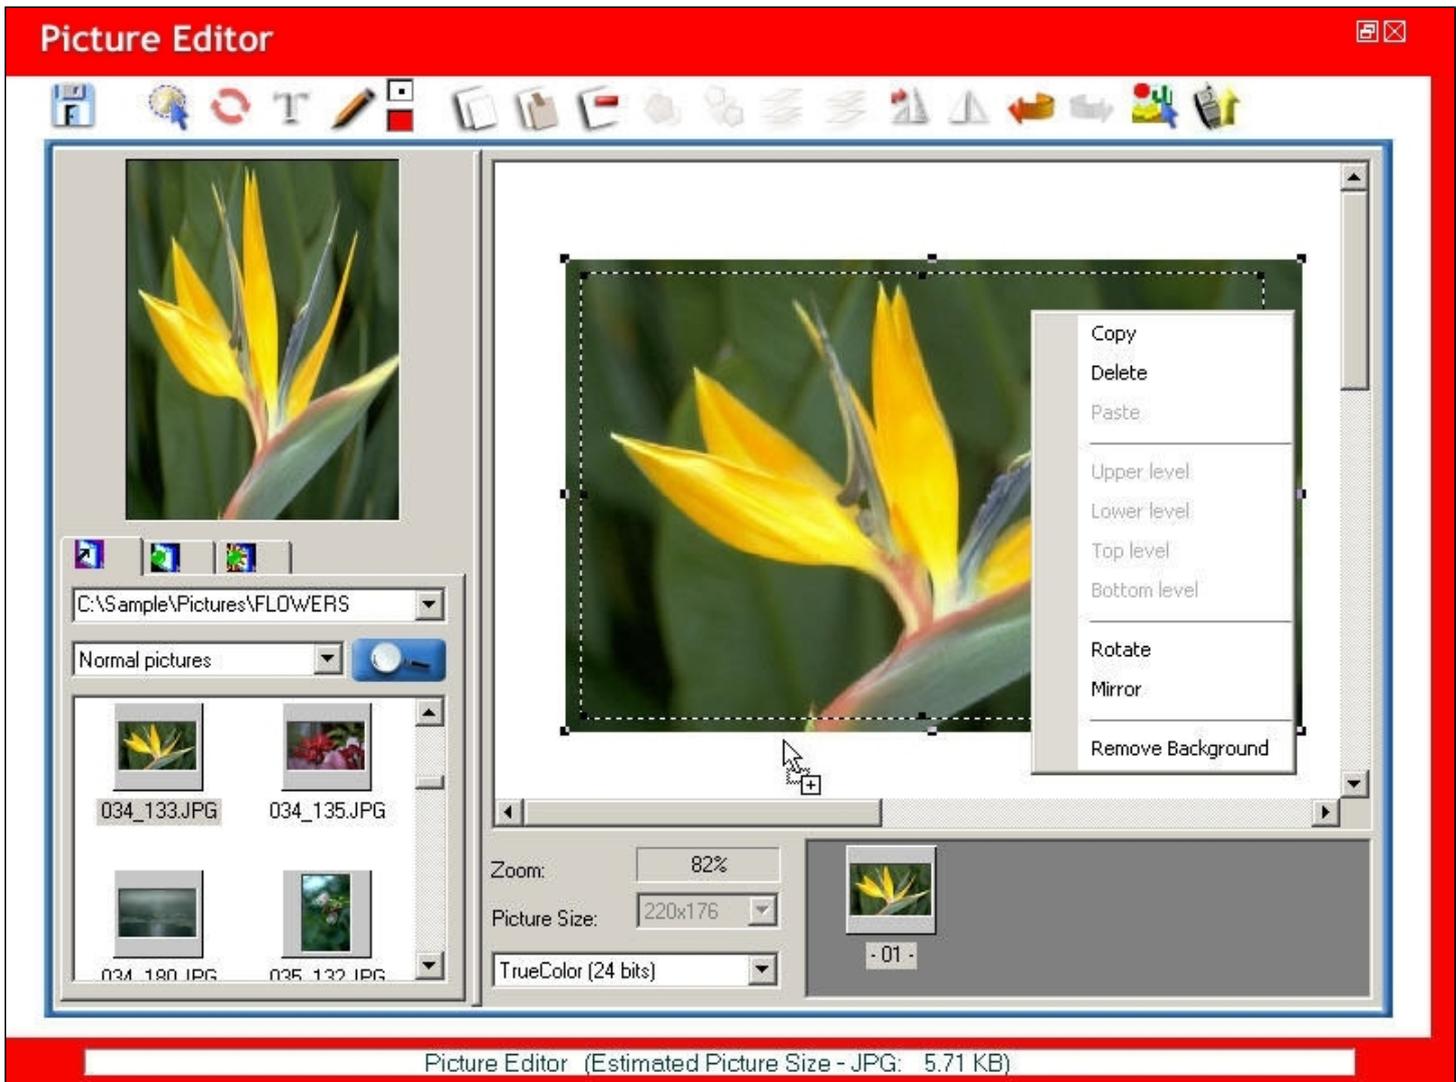

# Picture Editor

Picture Editor (Estimated Picture Size - JPG: 1.12 KB)

## Select image files:

Click  to select image files. Click  to choose folders that contain image files. Select **Normal pictures**, or choose a picture to **Set as Clip art, Frame or Mask**. Simply double-click an image to choose an image or drag and drop an image to the canvas. Right-click on the image to **Copy, Delete, Paste**, move the image to **Upper level, Lower level, Top level, Bottom level, Rotate, Mirror** or **Remove Background**.

**Edit image objects:**

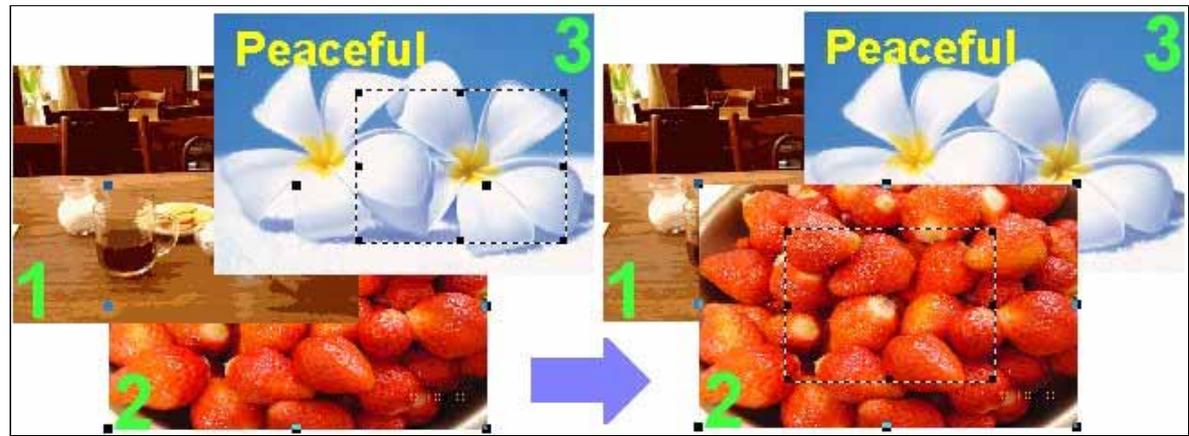

Edit image objects and move the selection area to preview edited image. You can also select **Picture Size** and set Selection Area as different **Colors**.

Picture Editor (Estimated Picture Size - JPG: 5.74 KB)

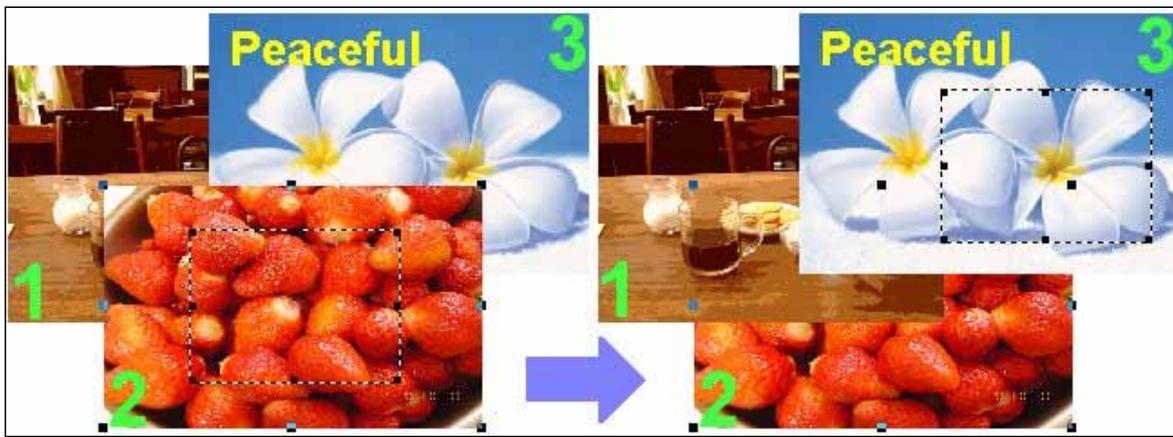

**Move the image object to the top level:**

Select the image object and click  to move the selected image object to the top level.

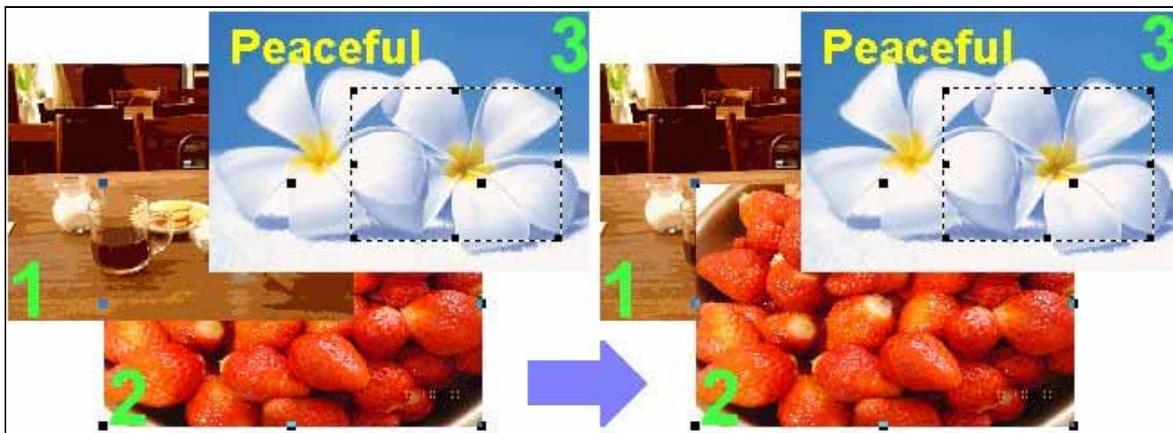

**Move the image object to the bottom level:**

Select the image object and click  to move the selected image object to the bottom level.

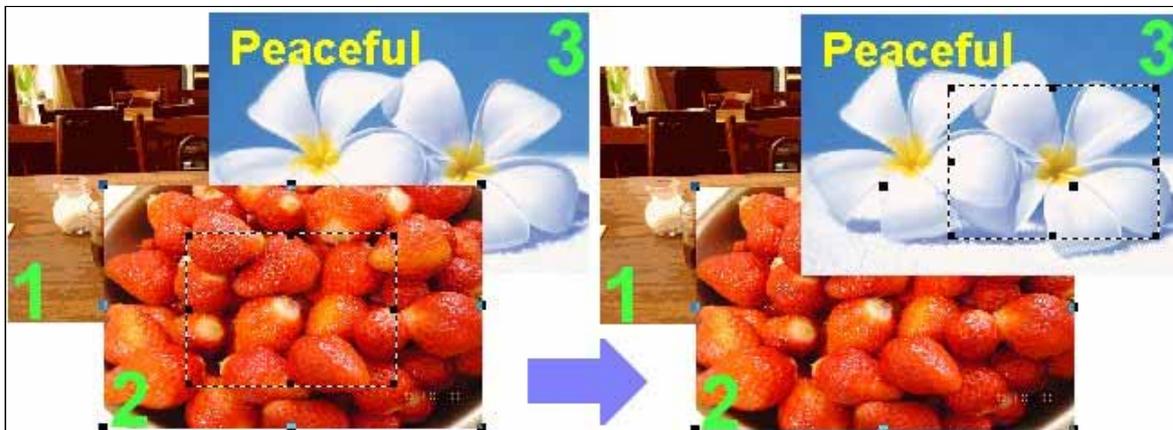

**Move the image object to the upper level:**

Select the image object and click  to move the selected image object to the upper level.

**Move the image object to a lower level:**

Select the image object and click  to move the selected image object to a lower level.

Click  to save and exit when you are done.

**Remove background of your picture:**

Click  to use **Remove Background**. With Remove Background, you can select any shape you want on an image object. All you have to do is mark the precise shape you want on an image object.

**Save and Exit:** Save your picture and exit this window.

**Activate Selection:** Activate your selection.

**Reset Selection:** Reset all selection.

**Undo Selection:** Undo previous selection.

**Hide:** Hide the foreground or background within the Working Area.

**Show:** Show the the foreground or background within the Working Area.

**Working Area 1:**

1. The area that you can apply to the image object in order to hide or show the foreground/background.
2. Choose Working Area before you start to mark the image object. The smaller the Working Area, the more precisely you can select adjacent pixels with similar color on an image object.

**Working Area 2:**

1. The area that you can apply to the image object in order to hide or show the foreground/background.
2. Choose Working Area before you start to mark the image object. The smaller the Working Area, the more precisely you can select adjacent pixels with similar color on an image object.

**Working Area 3:**

1. The area that you can apply to the image object in order to hide or show the foreground/background.
2. Choose Working Area before you start to mark the image object. The smaller the Working Area, the more precisely you can select adjacent pixels with similar color on an image object.

**Working Area 4:**

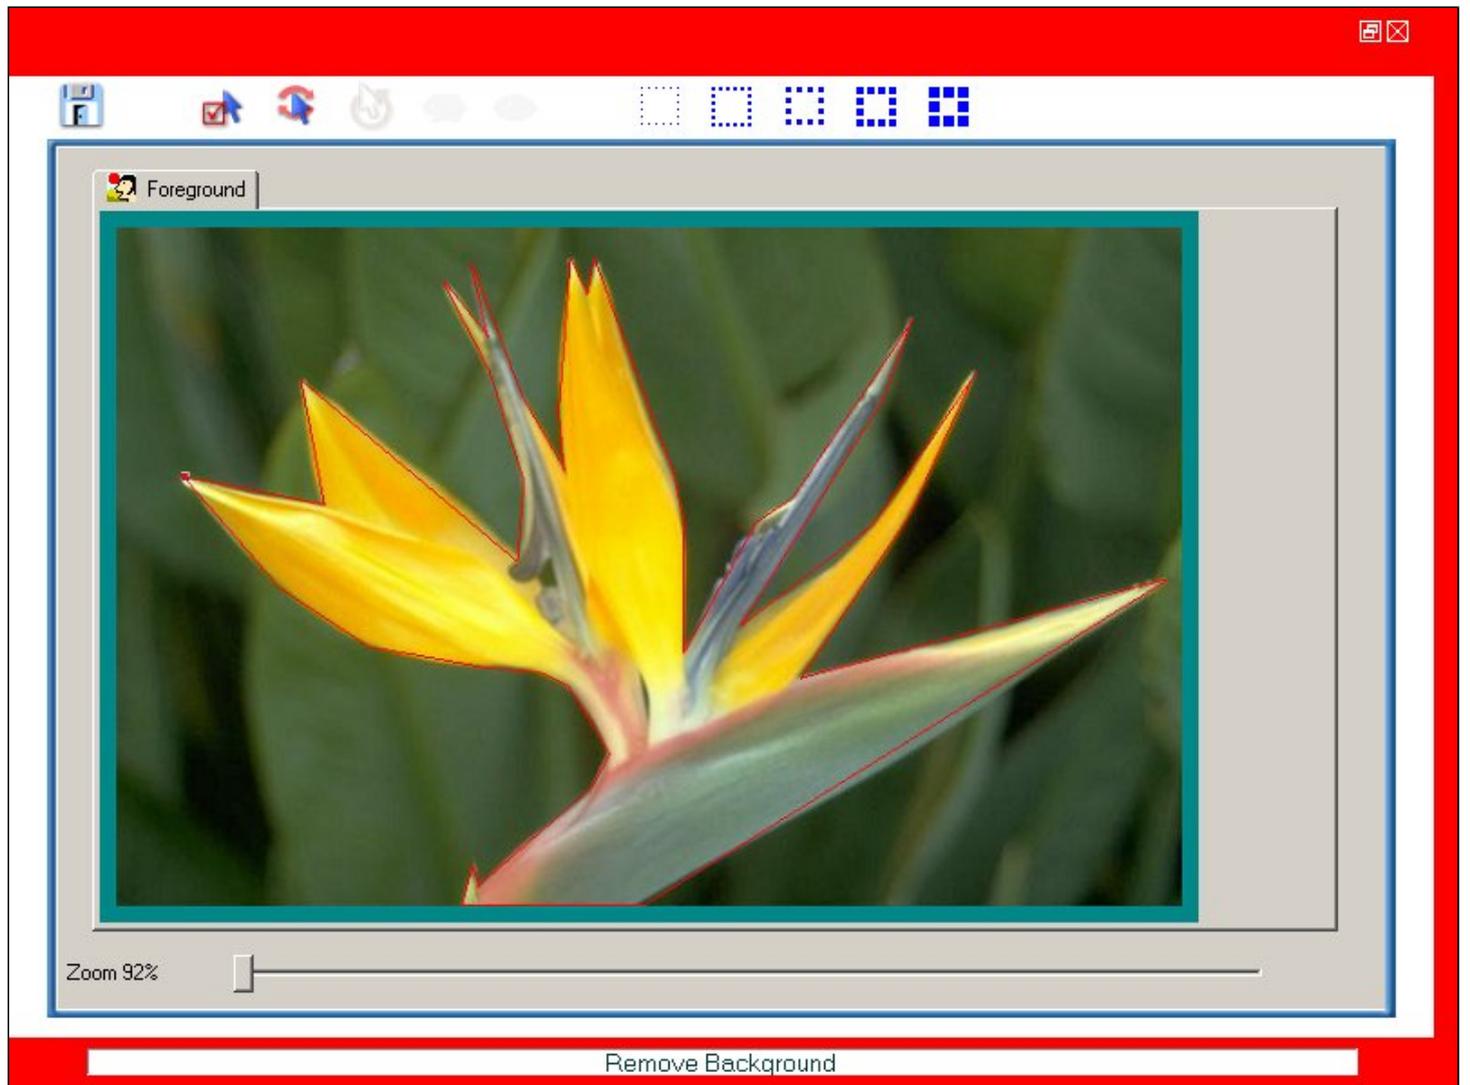

1. The area that you can apply to the image object in order to hide or show the foreground/background.
2. Choose Working Area before you start to mark the image object. The smaller the Working Area, the more precisely you can select adjacent pixels with similar color on an image object.

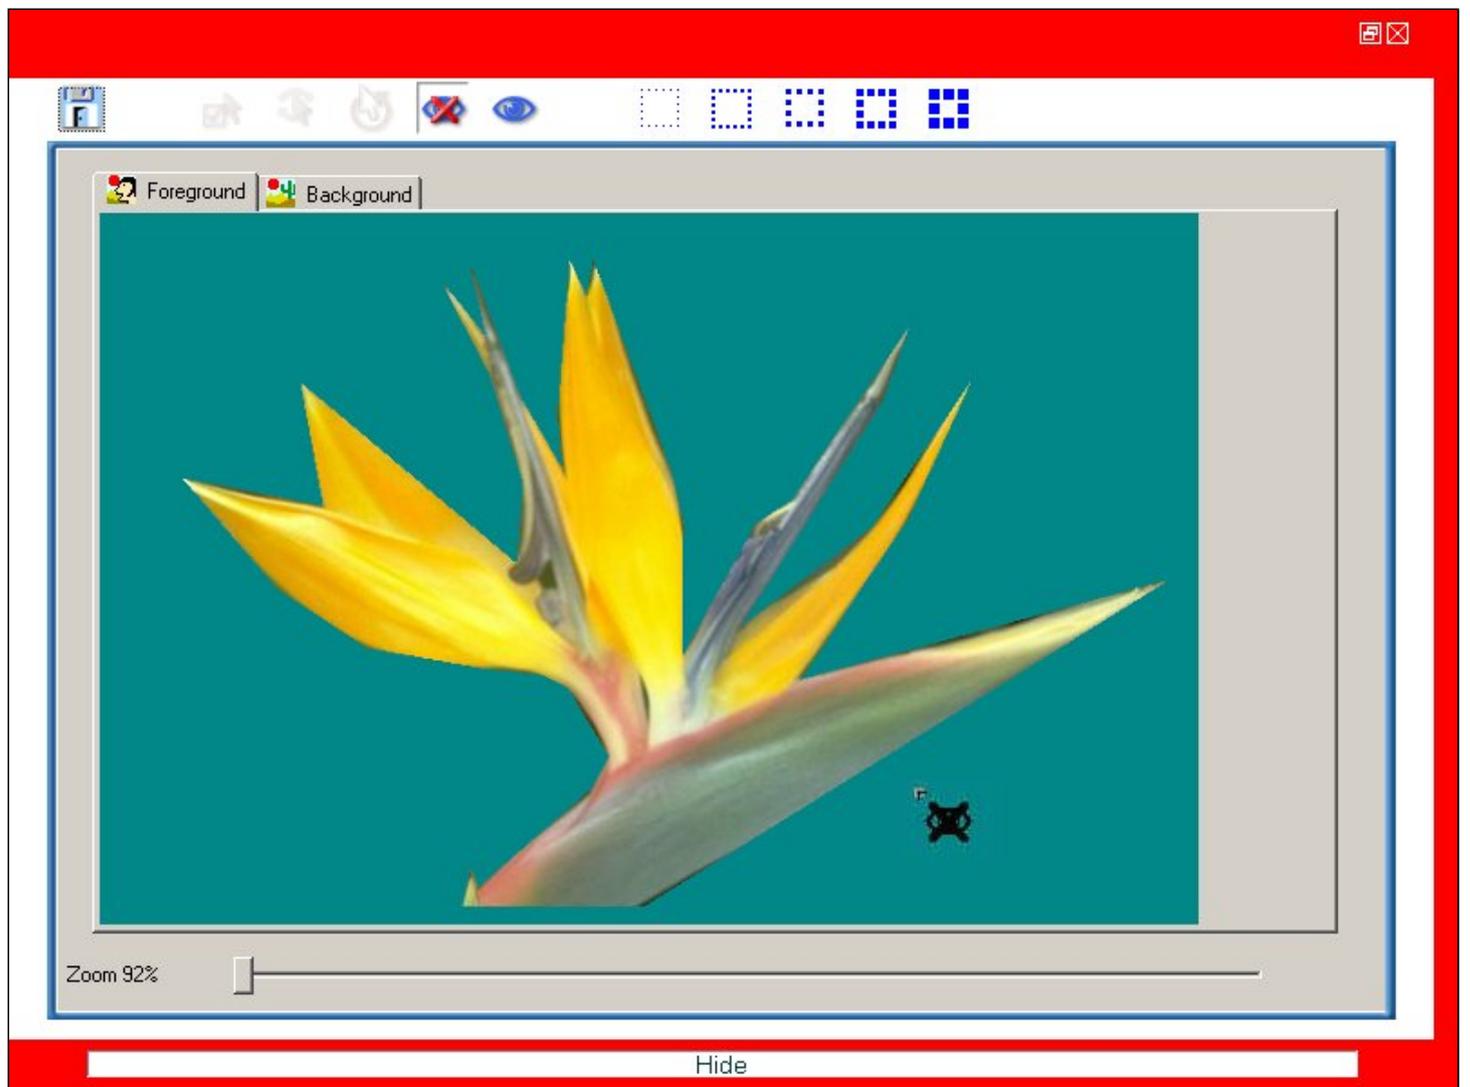

**Working Area 5:**

1. The area that you can apply to the image object in order to hide or show the foreground/background.
2. Choose Working Area before you start to mark the image object. The smaller the Working Area, the more precisely you can select adjacent pixels with similar color on an image object.

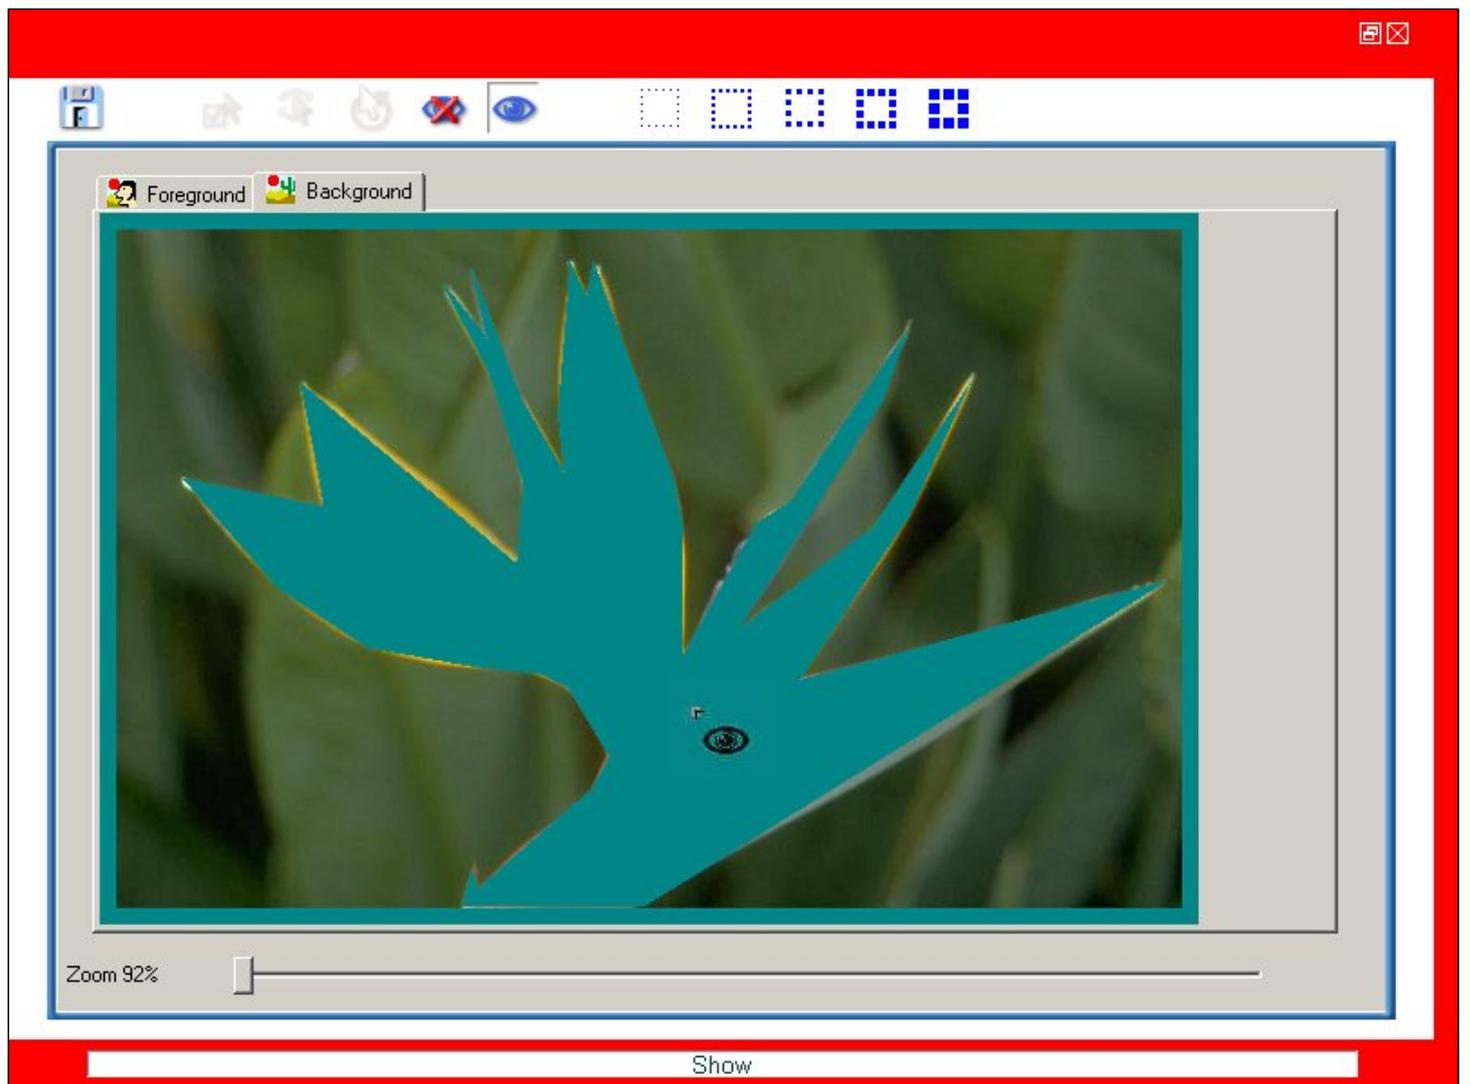

Select **Working Area**. Start at one point on the shape you want to select and click on the curve. When you complete circling the shape, double-click the selected area then click  to activate selection.

The area that you selected will become foreground. Select  to hide the area you don't want to show. Naturally, the area you choose to hide in the foreground will be shown in the background in the same picture.

Select  to show the area you want to show. Naturally, the area you choose to show in the background will be hidden in the foreground in the same picture.

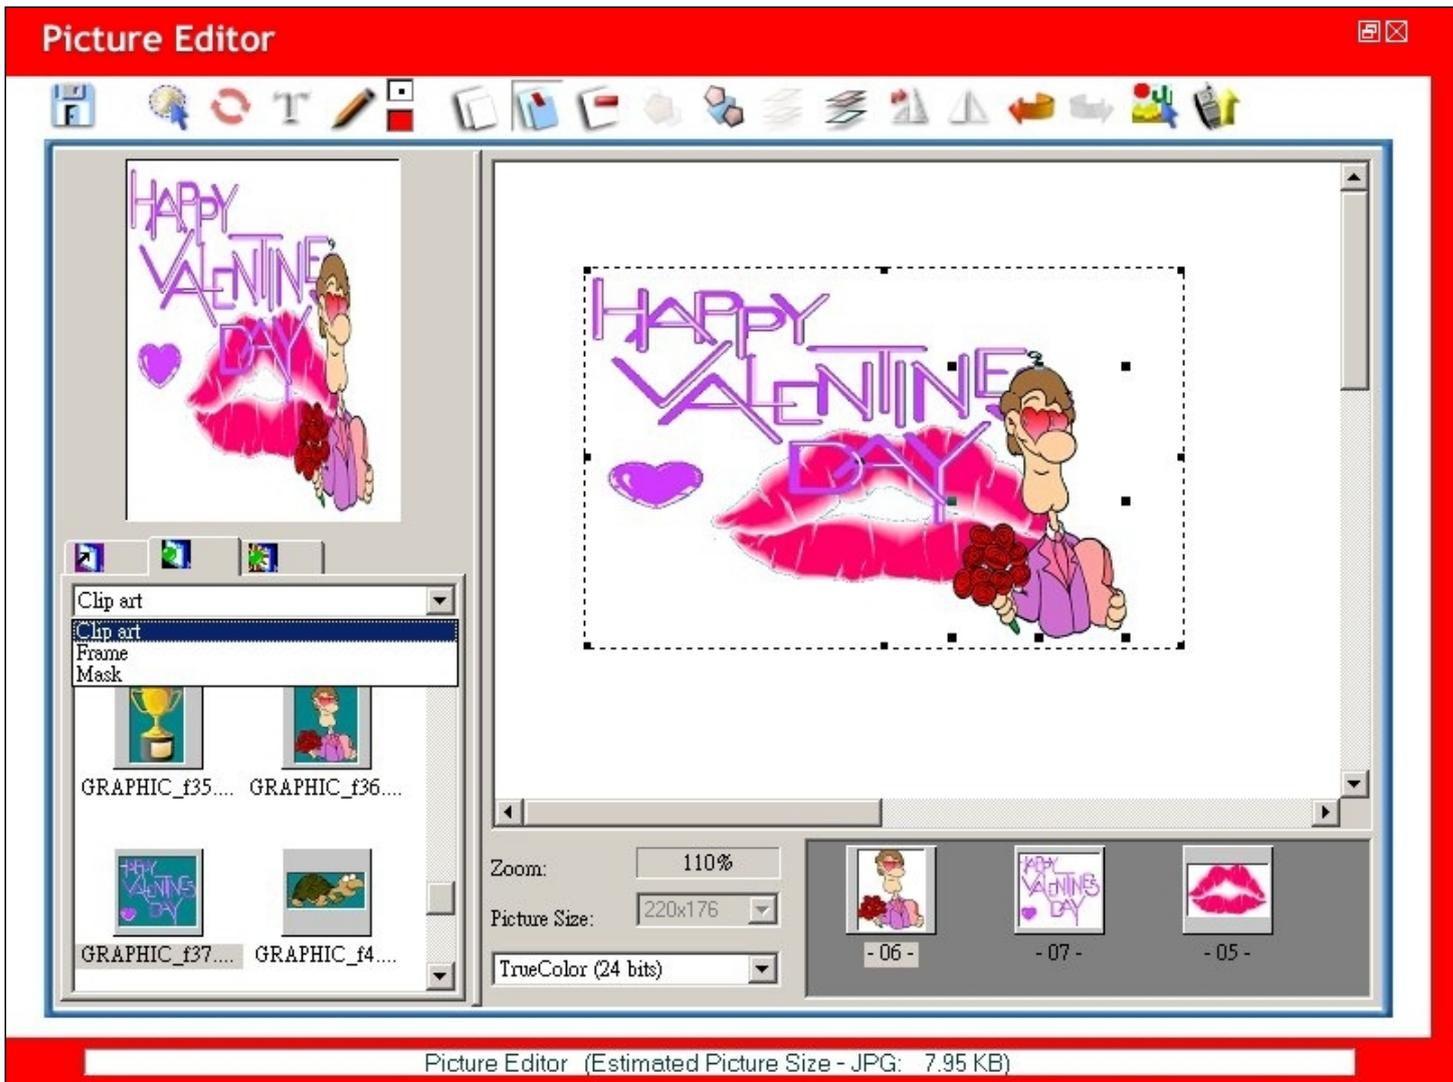

Select images from Library to create your own picture:

Click  to select **Clip art**, **Frame** and **Mask** from library to create your own picture.

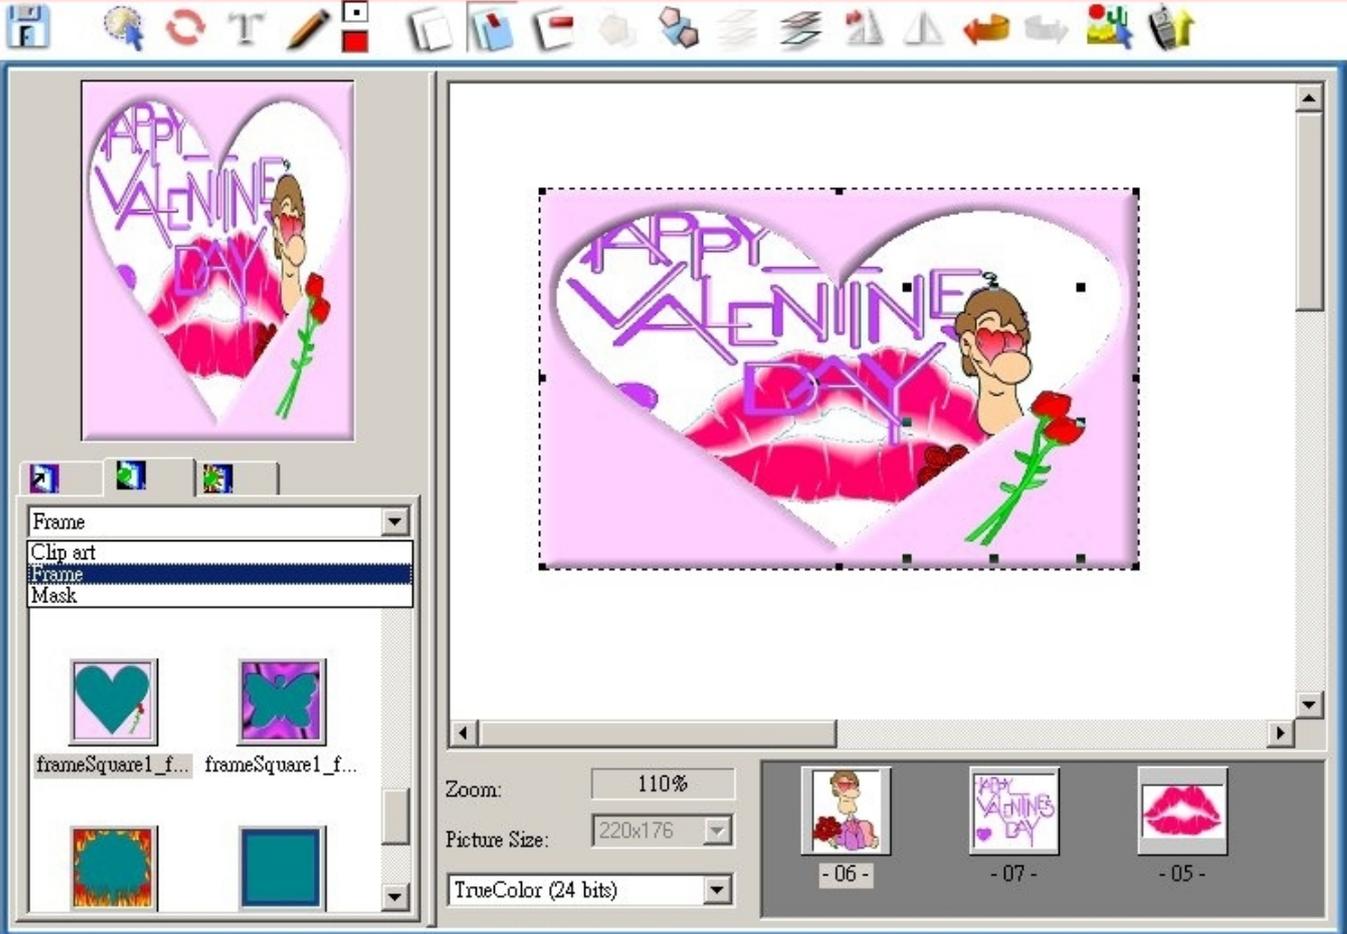

Select clip art to create your own picture:

Simply double-click on clip arts or drag and drop them to the canvas to create your own picture.

**Select frame to create your picture:**

Simply double-click on a frame or drag and drop it to the canvas to create your own picture. Select  to reset frame in the selection area.

Picture Editor (Estimated Picture Size - JPG: 8.30 KB)

**Select mask to create your picture:**

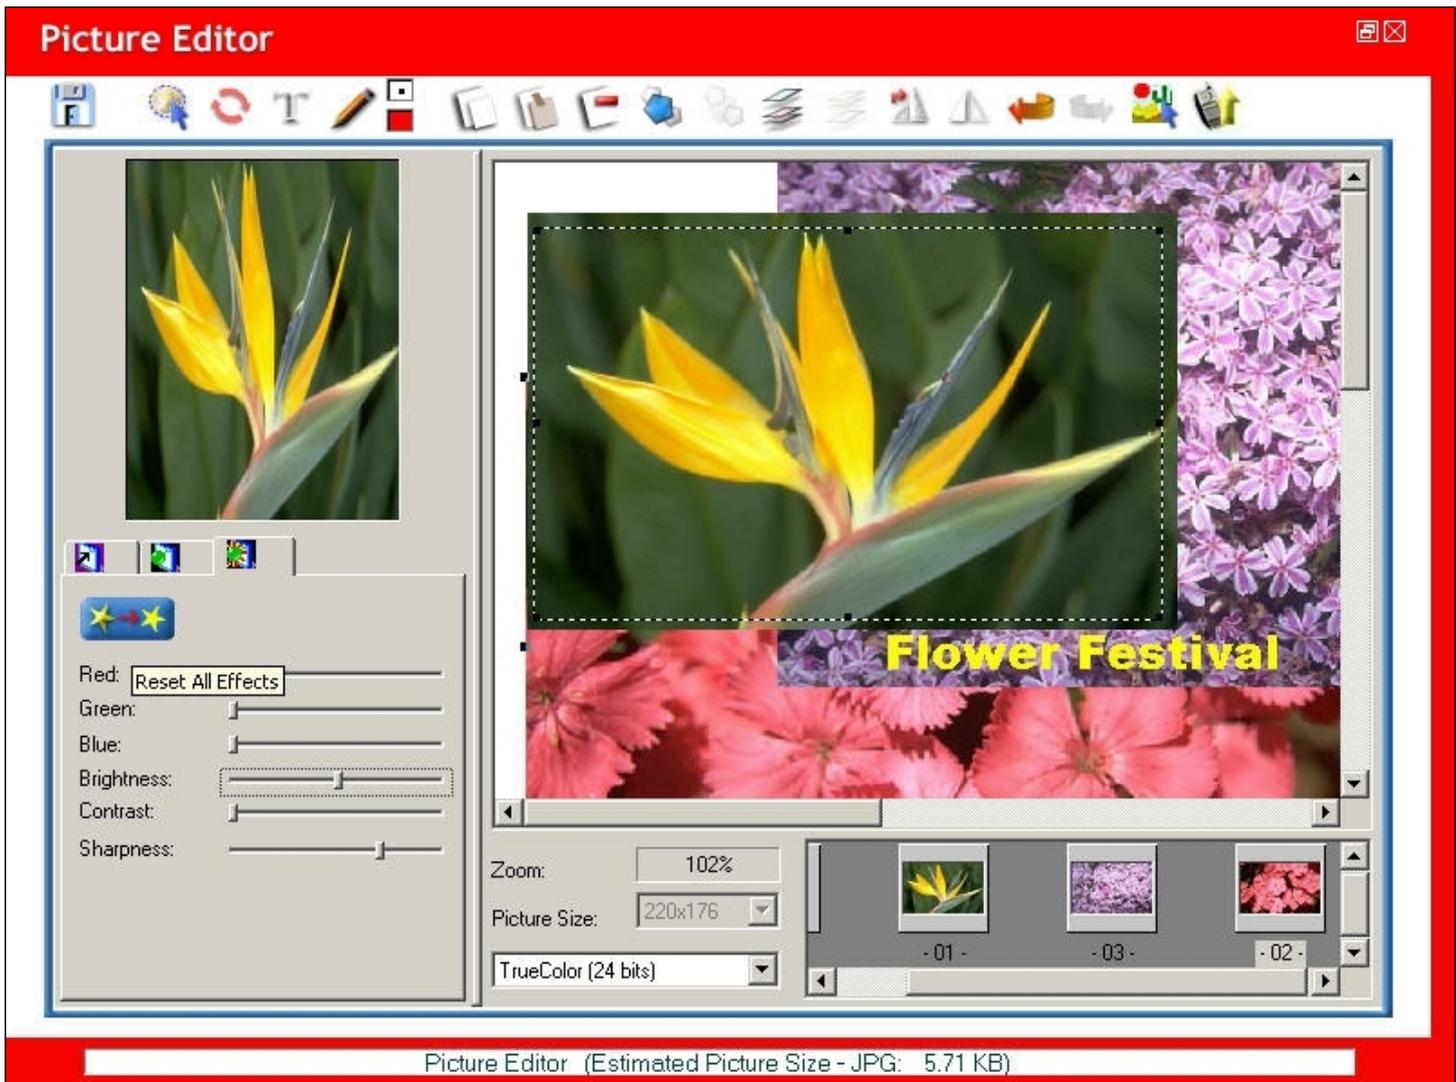

Simply double-click on a mask or drag and drop it to the canvas to create your own picture. Only the green area inside the mask will be displayed. Select  to reset mask in the selection area.

## Melody

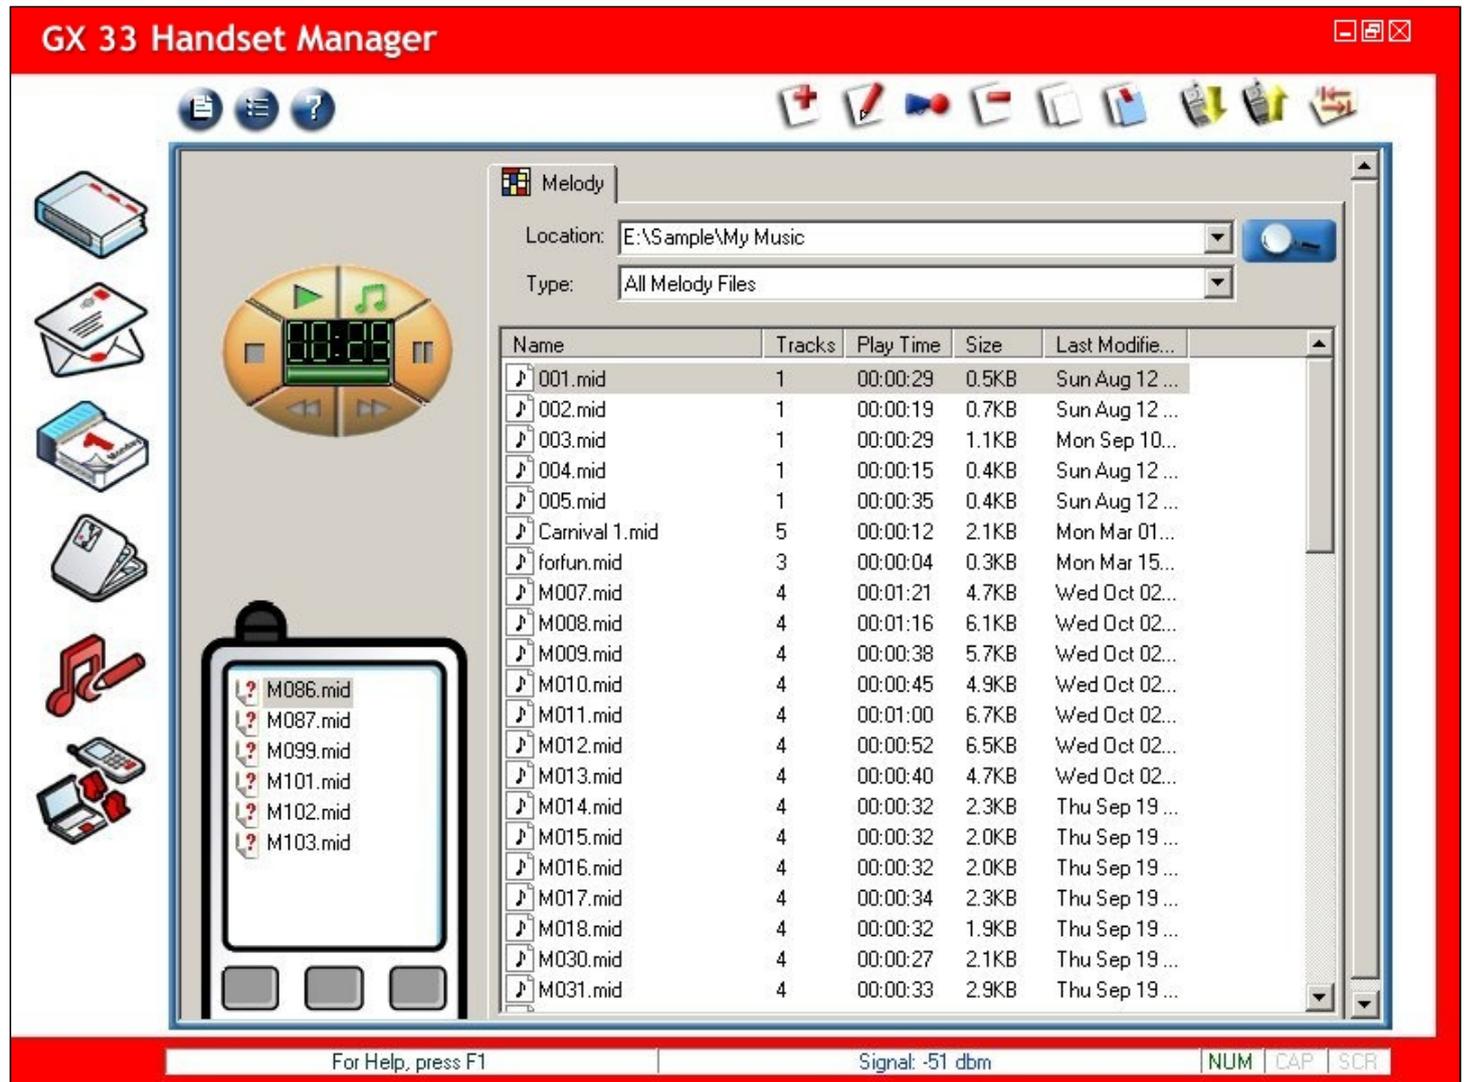

Melody is the perfect tool to edit and compose a melody. Compose your own melody to make yourself stand out from the crowd. You can listen to how your melody will sound like on the handset before you update it to the handset. Tune your melody until you are satisfied with it.

Click  to browse for folders that contain MIDI files. Choose type of melody files. Select the melody that you wish. Click **OK** when you are done.

Melody allows you to view **Name** of the track, **Tracks**, **Play Time**, **Size** and **Last Modified Date**.

### Edit Melody:

-  **File:** File menu contains creating **Convert MID to MMF** and **Exit**.
-  **New:** Compose new melody.
-  **Edit:** Edit the melody.
-  **Special Effect Composer:** Add **WAVE** to melody.
-  **Delete:** Delete the melody.
-  **Copy:** Copy the melody.
-  **Paste:** Paste the melody
-  **Download from handset:** Download the melody from handset.
-  **Update to handset:** Update the melody to handset.
-  **Refresh folder:** Refresh folders.

### Work with files:

Click  on the main menu.

Choose:

**Convert MID to MMF:** Convert the MIDI file to MMF file.

**Exit:** Exit this program.

## Listen to the melody:

After you have selected the melody, click  to listen to the melody or click  to simulate the melody playing on the handset. Click  to stop playing the melody when you are done. Click  to pause playing the melody. Click  to fast forward the melody. Click  to rewind the melody.

## Compose melody:

Click  to compose melody:

 **Save and Exit:** Save your melody and exit this window.

 **Play:** Play the melody.

 **Simulate Play:** Simulate the melody playing on the handset.

 **Tempo:** Adjust the melody tempo.

 **Cut:** Cut the notes.

 **Copy:** Copy the notes.

 **Paste:** Paste the notes.

 **Undo:** Undo previous action.

 **Redo:** Redo previous action.

 **Input note:** Input notes as you desire.

 **Left Mark and Right Mark:** Mark the section which you wish to copy.

 **Extract from chart:** Extract the section that you desire from the chart.

 **Raise a note by a semitone and Lower a note by a semitone:** Raise a note by a semitone and Lower a note by a semitone.

 **Track Manager:** You can choose **New Track**, **Track Title**, **Delete Track**, **Duplicate Track**, **Move Track Up**, and **Move Track Down**.

 **Change instruments:** You can choose up to 128 instruments.

 **Update to handset:** Update the melody to handset.

 **Delete a note:** Select this button and choose a note to delete on the track.

 **Whole note:** Select this note and insert to the track.

 **Half note:** Select this note and insert to the track.

 **Fourth note:** Select this note and insert to the track.

 **Eighth note:** Select this note and insert to the track.

 **Sixteenth note:** Select this note and insert to the track.

 **Thirty-second note:** Select this note and insert to the track.

 **Whole period:** Select this note and insert to the track.

 **Half period:** Select this note and insert to the track.

 **Forth period:** Select this note and insert to the track.

 **Eighth period:** Select this note and insert to the track.

 **Sixteenth period:** Select this note and insert to the track.

 **Thirty-second period:** Select this note and insert to the track.

 **Sharp:** Select this note and insert to the track.

 **Dotted note:** Select this note and insert to the track.

**Enable track:** Check this button to enable a track.

**Disable track:** Uncheck this button to disable a track.

 **Adjust track volume:** Adjust track volume.

Compose your own melody by inserting different notes on the track. Click  to update the melody to your mobile phone directly.

## Save melody:

Select  to save melody. Click **OK** when you are done.

## Compose special effect:

Click  to compose special effect.

**Save and Exit:** Save your melody and exit this window.

**Play:** Play the melody.

**Simulate Play:** Simulate the melody playing on the handset.

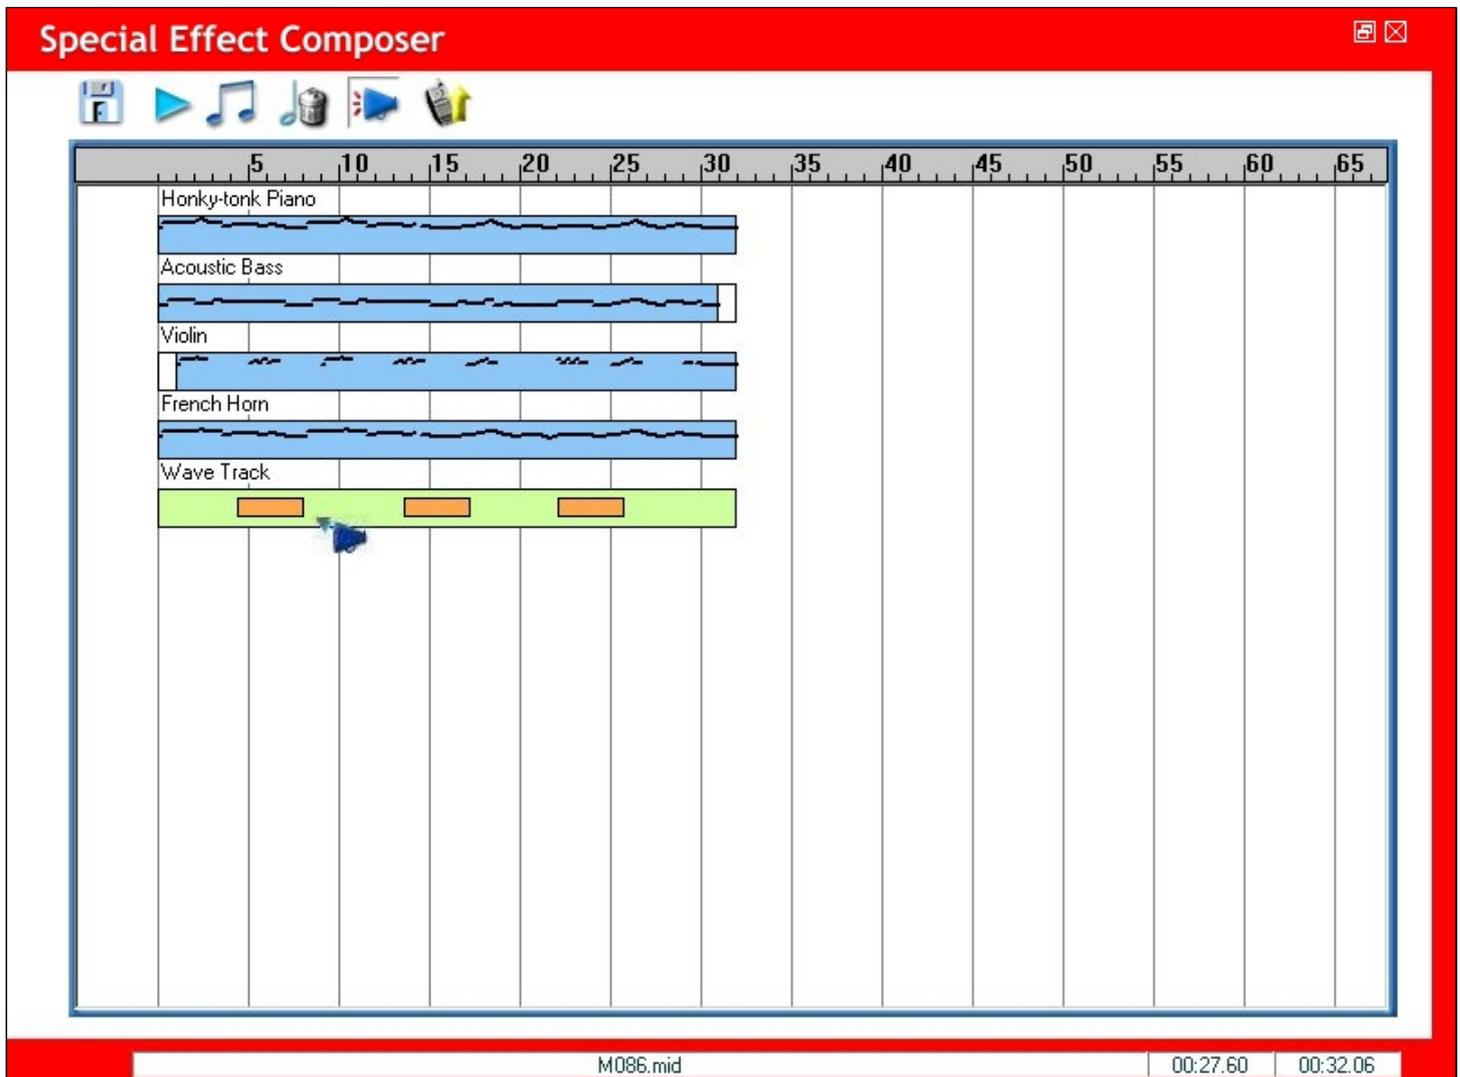

**Remove Special Effect Mark:** Select this button and choose a special effect mark to delete in front of the track.

**Add WAVE to play:** Insert Wave sound to the Wave Track.

**Update to handset:** Update the melody to handset.

**Special Effect Composer**

Timeline: 5, 10, 15, 20, 25, 30, 35, 40, 45, 50, 55, 60, 65

Tracks:

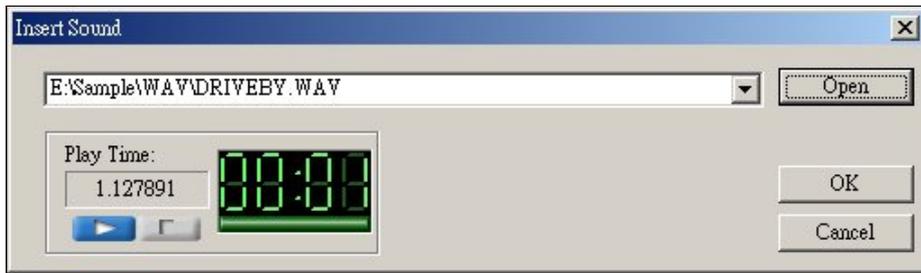

- Honky-tonk Piano
- Acoustic Bass
- Violin
- French Horn
- Wave Track

Wave Track contains three orange rectangular markers. A blue mouse cursor is positioned over the first marker.

Bottom status bar: M086.mid | 00:27.60 | 00:32.06

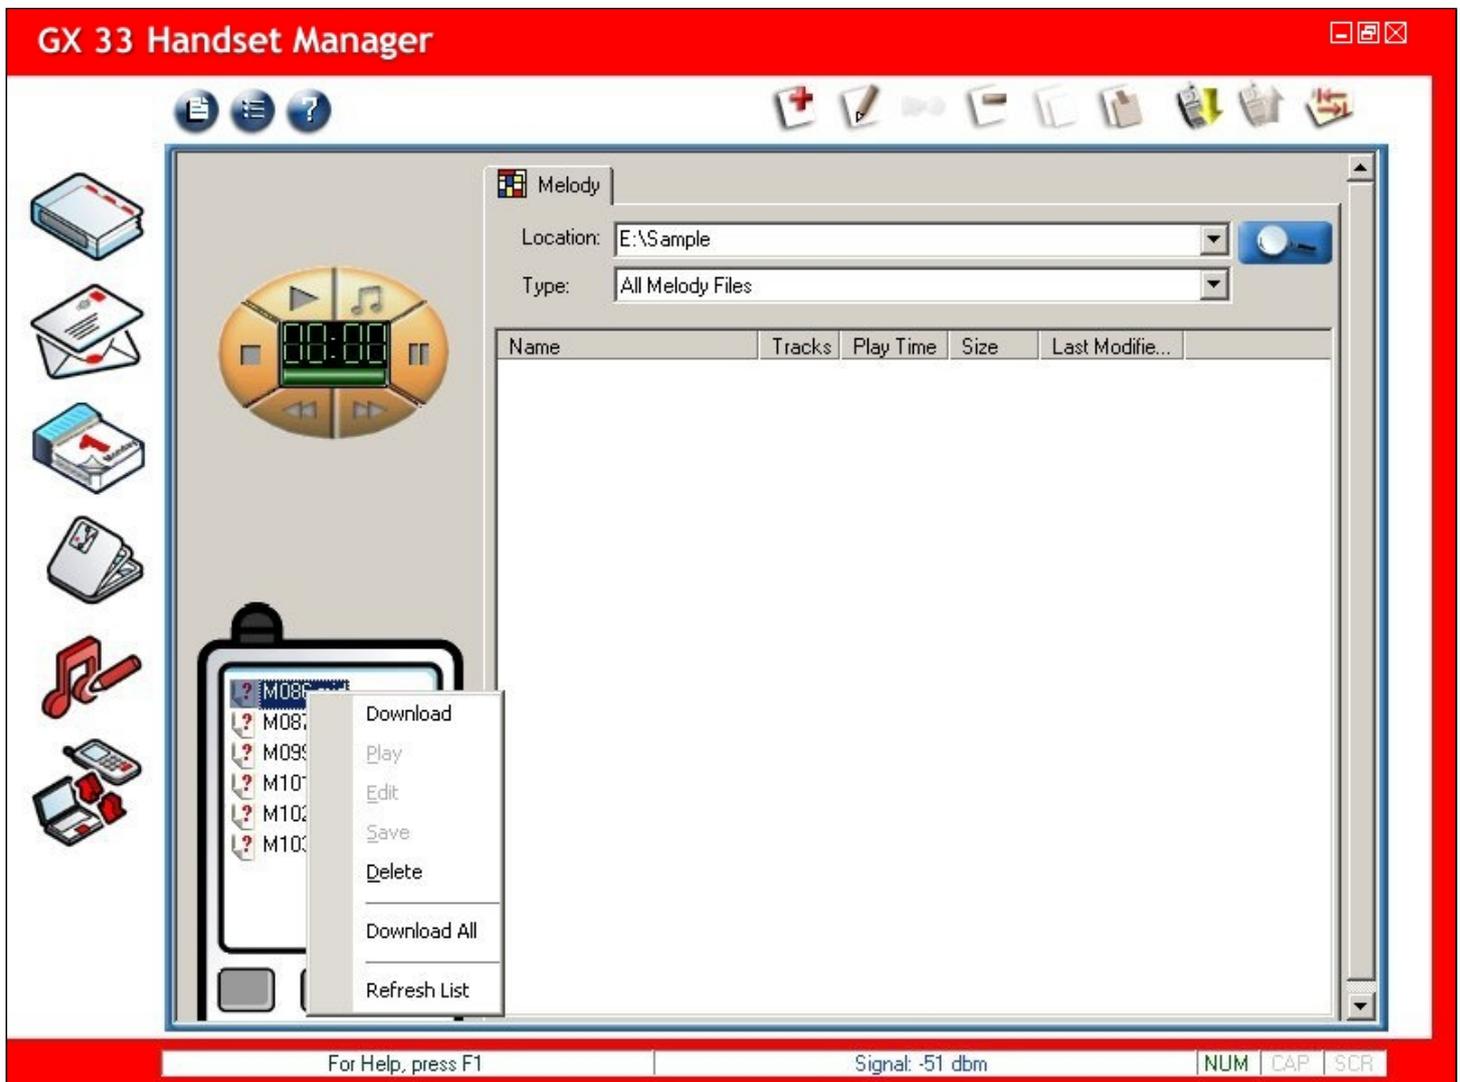

## Insert sound:

Click  to insert Wave sound to the Wave Track. Select **Open** to choose Wave files and click  to listen to the Wave sound.

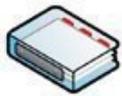

## Work with the melody on the handset:

Right-click on the melody shown on the handset screen to choose **Download**, **Play**, **Edit**, **Save**, **Delete**, **Download All** and **Refresh List**.

## Download melody from handset:

Select **Download** and the melody will be downloaded from handset.
