**2.** Slide the SIM/USIM card into the SIM/USIM holder.

 Hold the battery so that the metal contacts of the battery are facing down, slide the guides on the top of the battery into the battery slots (3), and then insert it (4).

4. Replace the battery cover.

#### Note

- Make sure that only 3V SIM/USIM cards are used.
- Make sure that the standard accessory battery is used.

# Removing the SIM/USIM Card and the Battery

- 1. Ensure that the phone is turned off and that the charger and other accessories are disconnected. Slide off the battery cover.
- **2.** Lift the battery using the protruding edge and remove the battery from the phone.
- **3.** Slide the SIM/USIM card out of the SIM/USIM holder.

4. Hold the battery so that the metal contacts are facing down and slide them into the slots. Close the cover.

### **Battery Disposal**

The device is battery-powered. In order to protect the environment, please read the following points concerning battery disposal:

- Take the used battery to your local waste depot, dealer or customer service centre for recycling.
- Do not expose the used battery to a naked flame, immerse in water or dispose with the household waste.

### **Charging the Battery**

### Using the Charger

1. Open and rotate the cover of the external connector halfway around, connect the charger to the external socket located on the side of the phone by pressing both sides indicated with arrows, and connect to an AC outlet.

The small light turns red. Standard charging time: Approx. 140 minutes

Note

- When you purchase this phone, the battery may not be fully charged.
- Charging time may vary depending on the state of the battery and other conditions. (See "Battery" on page 135.)

### To Disconnect the Charger

When charging is complete, the small light turns off.

- 1. Unplug the charger from the AC outlet, then unplug the charger connector from the phone.
- 2. Close the cover.

### Note

 Do not use any non-approved chargers as they may damage your phone and invalidate any warranties, see "Battery" on page 135 for details.

#### IMPORTANT SAFETY INSTRUCTIONS — SAVE THIS INSTRUCTION DANGER — TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, CAREFULLY FOLLOW THIS INSTRUCTION

If the shape and size of the plug do not match the power socket, use a plug adapter that matches.

To Charge Using the Cigarette Lighter Charger The optional cigarette lighter charger supplies power for charging from the cigarette lighter socket of a car.

### **Battery Level Indicator**

The current battery level is displayed in the upper right of the main display and in the left of the external display.

#### Low Battery during Use

When the battery is running low, an alarm will sound and " $\blacksquare$ " is displayed on the main and external displays.

If you are using your phone and you hear the low battery alarm, attach your charger as soon as possible. The phone may not be able to continue normal operation if you continue to use it.

## Navigating Functions

All applications are accessed from the Main menu. To open the Main menu, press the centre key  $(\mathbf{O})$  in stand-by.

To launch applications, you will need to highlight menu items, and make selections. To select a menu item (indicated in quotation marks), move the cursor using  $\textcircled{\baselinewarepsilon}$ ,  $\textcircled{\baselinewarepsilon}$ ,  $\textcircled{\baselinewarepsilon}$  to select.

In certain procedures, you will need to press one of the soft keys (indicated in square brackets), which are displayed in the lower left and right of the screen. Press the corresponding soft key  $(\square \circ \square)$ .

To return to the previous screen, press the right soft key if it displays *Back*. To close the Main menu, press the right soft key if it displays *Exit*.

Each section in this user guide starts with a list of items you will need to select in order (indicated in italics) before performing the procedures shown. Select each item to reveal the next set of items that you have to select. Open subsection items after opening those listed in the main section.

Example:

"Call Manager"  $\rightarrow$  "Phonebook"  $\rightarrow$  "Add New"

## Voice Call/Video Calling Functions

### Making a Voice Call

1. Enter the area code and the phone number you wish to dial and press 🗅 to dial.

If you enter the wrong number, press  $\boxed{}$  to delete the number to the left of the cursor.

### **Emergency Calls**

1. Enter 112 (international emergency number) using the keypad and press 🗅 to dial.

#### Note

- Emergency calls may not be able to be made on all mobile phone networks when certain network services and/or phone features are in use. Contact your service provider for more information.
- This emergency number can normally be used to make an emergency call in any country, with or without a SIM/USIM card inserted, if a 3G (UMTS)/ GSM network is within range.

### International Calls

1. Long press 🗊 until a + (international dialling prefix) sign is displayed.

2. Enter the country code, followed by the area code (without the leading zero) and the phone number, and press 🗅 to dial.

## Adding an Entered Phone Number to the Phonebook

1. After entering a phone number, press [Options] and select "Save Number".

For details on creating a new entry, see "Add New" on page 47.

# FET Mobile Internet (M 2)

Your phone is already configured to access FET Mobile Internet.

FET Mobile Internet is a new mobile internet portal which is your gateway to a new world of information, games, music and services.

Because your phone uses 3G (UMTS), it has a system that is faster than previous ways of getting mobile information. Also, the connection is 'always on' which means there is no need to wait for dialling up. You only have to pay for the data you send or receive, not how long you're connected.

Your phone contains a WAP browser used for surfing on the Mobile Internet, where you can get a lot of useful information. Normally, pages are designed for a mobile phone.

Your phone is already setup to FET Mobile Internet site for WAP/MMS Settings.

## Main Menu

# Connecting WX-T81 to Your PC

You can use the following functions by connecting the WX-T81 to your PC using a USB port\* or *Bluetooth* wireless technology port:

- 3G/GSM GPRS modem
- · Handset Manager for WX-T81
- \* Requires an optional USB data cable for USB port connection.

# System Requirements

Operating System: Windows<sup>®</sup> 2000\*, Windows<sup>®</sup> XP\*\*

- \* Service Pack 4 or later
- \*\* Service Pack 2 or later

Supported Software:

Microsoft<sup>®</sup> Outlook/Outlook Express Interface:

USB port or *Bluetooth* wireless port CD-ROM drive

# 3G/GSM GPRS Modem

You can use WX-T81 as a 3G/GSM GPRS modem to access the Internet from your PC. Connect your phone to your PC via *Bluetooth* wireless technology or USB interface. Software installation on your PC is required. For details, see "Software Installation" on page 130.

#### Modem via the USB Cable

To use the modem function using a USB cable, use the cable mentioned above and see the instructions accompanying the cable.

#### Modem via Bluetooth connection

To use the modem function via *Bluetooth* wireless technology interface, see "Using the Bluetooth Wireless Function" on page 121 and turn the modem function on.

For details on software support, refer to the following site:

http://www.sharp-mobile.com

#### Note

- Modem communication is not possible while communicating with the Handset Manager via Bluetooth wireless technology or USB interface.
- Your phone exhausts the battery when connected to a *PC*, even when not communicating.

## Handset Manager

You can transmit the following items between your phone and your PC, and can use Phonebook entries on your PC:

- Gallery files (pictures/sounds/video clips/Other Documents data)
- · Phonebook entries
- · Schedule entries

For details on software support, refer to the following site:

http://www.sharp-mobile.com

# Software Installation

- You can download the software for WX-T81 from the FarEasTone website (http://www.fetnet.net/) by accessing the Internet. Download and install the software.
- **2.** Press the buttons following the guidance. The installation starts.
- **3.** Follow the on-screen instructions to complete installation.

#### Note

• The phone may not recognise the USB data cable if it is connected while an application (Camera, Gallery, etc.) is running. Connect the USB data cable in stand-by.

### 3G/GSM GPRS modem

 It is not recommended that you make or answer calls when you are using WX-T81 as a 3G/GSM GPRS modem. The operation may be interrupted.

#### Handset Manager

- Some large files may not be able to be transmitted from the PC to the phone.
- Applications (Camera, Gallery, etc.) do not run when the phone is connected to the PC via Bluetooth wireless technology interface or USB data cable.

# Safety Precautions and Conditions of Use

Your phone conforms to international regulations insofar as it is used under normal conditions and in accordance with the following instructions.

# **Conditions of Use**

#### Electromagnetic waves

- Do not switch on your phone aboard an aircraft (as your phone may interfere with the aircraft's electronic systems). Current legislation forbids this use and legal action can be taken against the user.
- Do not switch on your phone in a hospital, except in designated areas.
- Use of your phone's function may affect the performance of medical electronic units (pacemakers, hearing aids, insulin pumps, etc.). When the phone function is on, do not bring it near medical equipment or into areas in which medical equipment is being used. If you have a hearing aid or a pacemaker, only use the phone on the opposite side of your body from where it is located. The phone should be kept at least 6 inches (15.24 cm) from a pacemaker ANYTIME the phone is switched on.

- Do not switch on your phone near gas or flammable substances.
- Observe the rules concerning the use of mobile phones at gasoline stations, chemical plants and at all sites where a risk of explosion exists.

#### Caring for your phone

- Do not allow children to use your phone without supervision.
- Do not open or attempt to repair your phone yourself. The product can only be repaired by authorised service personnel.
- Do not drop your phone or subject it to severe impacts. Bending the body and pushing the display or keys with extreme force could damage the phone.
- Do not use solvents to clean your phone. Use only a soft, dry cloth.
- Do not carry your phone in your back pocket as it could break when you sit down. The display is made of glass and is particularly fragile.
- Avoid touching the external connector on the left side of the phone, since the delicate components within can be damaged by static electricity.

#### Battery

- Use your phone only with batteries, chargers and accessories recommended by the manufacturer. The manufacturer disclaims any liability for damage caused by the use of other chargers, batteries or accessories.
- Network configuration and phone usage will affect talk-time and stand-by time.

Using the games or camera will hasten battery consumption.

- When the battery charging alert is displayed on the screen, charge the battery as soon as possible. If you continue using your phone ignoring the alert, the phone may cease to function, and all data and settings you have stored may be lost at any moment.
- Before removing the battery from the phone, make sure the phone is switched off.
- Replace and charge the new battery as soon as possible after removing the old one.
- Do not touch the battery terminals. Batteries can cause damage, injury or burns if a conductive material touches exposed terminals. When the battery is detached from the phone, use a cover made of non-conductive material for keeping and carrying the battery safely.

- Recommended temperature for using and storing batteries is approximately 20°C.
- The batteries' performance is limited in low temperatures, particularly below 0°C and the phone may not work temporarily regardless of the amount of remaining battery power.
- Exposing the phone to extreme temperatures will shorten battery life.
- The battery can be charged and discharged hundreds of times but it will eventually wear out. When the operating time (talk-time and stand-by time) is noticeably shorter than normal, it is time to buy a new battery.

#### CAUTION

RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE, DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS See "Battery Disposal" on page 16.

#### Aerial Care

- Do not cover the lower part of the phone (p. 10, No. 18) with your hand when in use as this may interfere with the performance of the built-in aerial. Call quality may deteriorate leading to shortened talk-time and stand-by time because the mobile phone has to operate on a higher power level than is necessary.
- Use only the aerial supplied or one approved by Sharp for your mobile phone. Using unauthorised or modified aerials may damage the mobile phone. Moreover, since the mobile phone may violate the appropriate regulations, it may lose performance or exceed the limitation of SAR levels.
- To avoid impaired performance, do not damage the aerial of the mobile phone.
- To avoid interfering with blasting operations, please turn off the mobile phone in a blasting area or in a place where a "turn off two-way radio" sign is posted.

#### **Camera Operation**

- Learn picture quality, file formats, etc. beforehand. The taken pictures can be saved in JPEG format.
- Be careful not to move your hand while taking pictures.

If the phone moves while taking a picture, the picture can become blurred. When taking a picture, hold the phone firmly to prevent it from moving, or use the delay timer.

• Clean the lens cover before taking a picture. Fingerprints, oils, etc. on the lens cover hinder clear focusing. Wipe them off with a soft cloth before taking a picture.

#### Others

- As with any electronic storage unit, data may be lost or corrupted under various circumstances.
- Before connecting the phone with a PC or a peripheral unit, read the operation manual for the other unit carefully.
- If the phone's battery has been removed for some time, or the phone has been reset, the unit's clock and calendar may be reinitialised. The date and time should be updated in this case.

## Environment

- Keep your phone away from extreme heat. Do not leave it on the dashboard of a car or near a heater. Do not leave it in any place that is extremely damp or dusty.
- Since this product is not waterproof, do not use it or store it where fluids such as water can splash onto it. Raindrops, water spray, juice, coffee, steam, perspiration, etc. will also cause malfunctions.

## **Precautions Concerning Vehicle Use**

- It is the user's responsibility to check the local laws governing the use of a mobile phone in vehicles. Pay full attention to driving. Pull off to the side of the road, park the car, and switch off the engine before making or answering a call.
- Use of your phone's function may interfere with the vehicle's electronic systems, such as the ABS anti-lock brakes or the air-bag. To ensure no such problem occurs, please check with your dealer or car manufacturer before connecting your phone.
- Only allow qualified service maintenance personnel to install the vehicle accessories.

The manufacturer disclaims any liability for damage which may result as a consequence of improper use or use contrary to the instructions contained herein.

# SAR

Your Sharp mobile phone has been designed. manufactured and tested so as not to exceed the limits for exposure to electromagnetic fields as required by the DGT. These limits are part of comprehensive guidelines developed by independent scientific organisations. The guidelines include a substantial safety margin designed to assure the safety of the phone user and others and to take into account variations in age and health, individual sensitivities and environmental conditions. The DGT rules provide for the amount of radio frequency electromagnetic energy absorbed by the body when using a mobile phone to be measured by reference to the Specific Absorption Rate (SAR). The SAR limit for the general public is currently 2.0 watts per kilogram averaged over 10 grams of body tissue. Your Sharp mobile phone SAR value is 1.228 W/kg. This has been tested to ensure that this limit is not exceeded even when the phone is operating at its highest certified power. In use however your Sharp mobile phone may operate at less than full power because it is designed to use only sufficient power to communicate with the network.

# FCC NOTICE

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

### Exposure to Radio Waves

#### THIS MODEL PHONE MEETS THE GOVERNMENT'S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES.

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg.\* Tests for SAR are conducted using standard operating positions specified by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 0.280 W/kg and when worn on the body, as described in this user guide, is 0.741 W/kg. Body-worn Operation; This device was tested for typical body-worn operations with the back of the phone kept 1.5 cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5 cm separation distance between the user's body and the back of the phone. The use of belt-clips, holsters and similar accessories should not contain metallic components in its assembly.

The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided. While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF emission guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/oet/fccid after searching on FCC ID APYHRO00048.

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) web-site at http://www.phonefacts.net.

\* In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/ kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

# Out of Warranty List

This limited warranty shall not apply in respect of the following:

- Any deterioration due to normal wear and tear including all plastic surfaces and all other externally exposed parts that are scratched or damaged due to normal customer use.
- Defects caused by the Product being subjected to (ii) any of the following: use in contradiction with the user guide, rough handling, exposure to moisture. dampness or extreme thermal or environmental conditions or rapid changes in such conditions, corrosion, oxidation, unauthorised modifications or connections, unauthorised opening or repair, repair by use of unauthorised spare parts, misuse, improper installation, accident, forces of nature, spillage of food or liquid, influence from chemical products or other acts beyond Sharp's reasonable control (including but not limited to lifetime, and breakage of or damage to antennae) unless the defect was caused directly by defects in materials or workmanship.
- Products in respect of which the product serial number or the IMEI number has been removed, erased, defaced, altered or made illegible.

- (iv) Defects caused by the fact that the Product was used with or connected to a product or an accessory not manufactured or supplied by Sharp or was used other than for its intended use.
- (v) Defects caused by a defective function of the cellular network.
- (vi) Defects caused by the fact that the battery was short-circuited or seals of the battery enclosure or cells were broken or show evidence of tampering or the battery was used in equipment other than for which it has been specified.
- (vii) Defects caused by the need to upgrade Products software due to changes in cellular network parameters.
- (viii) Products operated outside published maximum ratings.
- (ix) Products rented on a monthly basis.
